## **AGENDA ITEMS**

## 1. CONSULTATION - REVENUE & FINANCING POLICY

| Type of Report:             | Legal and Operational                        |
|-----------------------------|--|
| Legal Reference:            | Local Government Act 2002                    |
| Document ID:                | 1298330                                      |
| Reporting Officer/s & Unit: | Adele Henderson, Director Corporate Services |

## 1.1 Purpose of Report

To review and update the policy by amending operational and capital funding sources for Council housing.

## **Officer's Recommendation**

That Council:

- a. Note the Revenue & Financing Policy will now allow for loan funding of operating costs for approved Council activities.
- b. Approve the inclusion of loan funding for operational expenditure and General Rates funding for capital expenditure for Council housing activities.
- c. Approve the draft Revenue and Financing Policy for consultation
- d. Approve the consultation plan for the Revenue & Financing Policy.

## 1.2 Background Summary

The Revenue & Financing Policy was adopted on 11 February 2021. During the development of the Long Term Plan and with rates pressures, Council requested a consideration of loan funding of operating costs. Council policy to date was firm that operating costs could not be loan funded. The update to the policy allows more flexibility on a case-by-case basis to loan fund where appropriate and approved by Council. This approach could be considered where costs may only be incurred for a number of years and are not ongoing (e.g. lease costs), where costs are transitioning from capex to opex (e.g. software as a service) and where decisions of Council on an activity have yet to be finalised (e.g. review of Council activities for the 2021-2031 Long Term Plan has identified a shortfall in funding for housing).

## 1.3 Issues

Council is required to fund its activities in the Long Term Plan as provided for in the Revenue and Finance Policy.

## Housing

As part of the development of the Long Term Plan and costs associated with the Housing activity of Council, the revenue from rents received was not sufficient to cover the increased costs associated with Healthy Homes compliance, building upgrades and maintenance. The purpose of the Housing activity is to provide affordable housing

particularly for those in retirement and on low incomes. A review of the Housing activity is currently underway that explores options for the delivery and provision of the service going forward in an affordable way. Consultation will be undertaken with the community later this year that looks at options and its ongoing sustainability.

To address the funding shortfall (approximately \$2m per annum) in the short term until a decision is made, it is proposed that loans be included as an additional source of funding for operational expenditure.

It is proposed that General Rates and loans be made available as an additional source of funding for capital expenditure for the Housing activity.

| Activity | Funding sources  |  |  |
|----------|--|--|--|
|          | Operational  | Capital  |  |
| Housing  | <ul> <li>Primary source</li> <li>Fees &amp; charges 100% (rentals)</li> <li>Other sources</li> <li>General Rates</li> <li>Loans</li> </ul> | <ul> <li>Accumulated surpluses</li> <li>Fees &amp; charges (rentals)</li> <li>Loans</li> <li>Grants</li> <li>Reserves</li> <li><i>General Rates</i></li> </ul> |  |

The proposed amendments are presented in *italics*:

## 1.4 Significance and Engagement

Public consultation will be required and undertaken as a separate consultation in parallel with the Long Term Plan 2021-2031. For the purposes of the development of the Long Term Plan, loan funding of the above issues have been included in the plan.

## 1.5 Implications

## Financial

The proposed amendments will allow housing costs to be funded through borrowings. Where loans are used to fund capital expenditure, the proposed amendments will allow for loan repayments to be paid from General Rates.

## Social & Policy

The amendment to the Revenue & Financing Policy provides for loan funding of operating costs.

## Risk

For Council the risk lies in short-term funding issues not being addressed over the longer term. In that scenario, a portion of operational cost would continue to rely on debt as a funding source and is not considered financially prudent. Council must ensure that any debt funding is contained within its income to debt benchmark.

## 1.6 Options

The options available to Council are as follows:

- a. Accept the proposed amendments.
- b. Accept selected amendments / make amendments.
- c. Accept none of the proposed amendments.

## 1.7 Development of Preferred Option

a. Accept the proposed amendments

The preferred option has been developed in conjunction with work conducted on the Long Term Plan 2021-2031 and has included the proposed changes to the funding for the housing activity until such time that further separate consultation has been undertaken with the community.

### Purpose

The Revenue and Financing policy is adopted under Sections 102(1) & 103(1) of the Local Government Act 2002 and must contain Napier City Council's general policies on the funding of operating and capital expenditure and show how the local authority has, in relation to the sources of funding identified in the policy, complied with Section 101(3) which has two parts.

### Policy Background

Napier City Council (Council) has reviewed the proposed sources of funding for operating and capital expenditure and has reviewed the funding for each activity to determine the funding policy for each. In accordance with the Local Government Act 2002 (LGA) Council has considered each activity with regard to the following:

- Community outcomes to which an activity contributes; and
- the distribution of the benefits between the community as a whole, identifiable parts of the community and individuals; and
- the period in or over which those benefits are expected to occur; and
- the extent to which actions or inactions of individuals or groups contribute to the activity; and
   costs and benefits of funding the activity distinctly from other activities.

Council has considered each activity to determine what it considers an appropriate funding source for both operating and capital expenditure (refer to the schedule in the appendix).

Then it has considered the overall impact of any allocation of liability for revenue needs on the current and future social, economic, environmental, and cultural wellbeing of the community. It considered the following in determining the final funding source:

- The nature of Napier City as a whole including as a visitor and tourist destination; and
- the different costs of providing services and facilities and the associated benefits that the commercial (including accommodation providers) and industrial properties receive from those services; and

- the impact of rates on residential properties, and in particular on the affordability of rates for low, average and fixed income households; and
- the complexity of the rating system and the desirability of improving administrative simplicity; and
- The appropriate use of the General Rate.

Council has concluded that the General Rate and storm water targeted rate on commercial and industrial should have an appropriate differential recognising the issues considered above.

Council has also considered the impact of fees and charges. Council uses the market rate (where permissible) as the upper limit used for determining fees or charges. Where Council believes the imposition of fees or charges at a rate above the market rate will reduce usage of the activity or facility and lead to the imposition of a greater cost on ratepayers it will modify the amount chargeable to the market rate. In selecting the market rate, the Council has made a judgement that the community values the existence of the facility and would rather fund it from rates than for the facility to close.

Following consideration of the above the Council is proposing the use of the following funding tools

## Council's policies on funding operating expenses and capital expenditure

#### General Rates

General Rates are used to fund both operating and capital expenditure. They fund the remaining costs of Council operations after all other sources of funding have been applied.

The General Rate has a significant component of public good or activities when the community benefits as a whole, and as the General Rate is a general taxing mechanism shifting the "differential factor" for each sector's share of the city's overall land value is the principal means that the Council has used to of achieving the desired overall rates impact on the wider community. It cannot achieve precise equity or allocation of costs to each type of property.

In determining differentials for General Rates, the intensity of development (i.e. building and surfaces) is considered a significant factor. With reference to observed property size and as the most common differential, Residential/Other was set as the base property type. Other differentials are set in reference against Residential/Other.

General Rates are assessed through a combination of a Uniform Annual General Charge (UAGC) and a rate in the dollar based on land value.

Council has set the following land value differential categories:

- Residential/Other
- Commercial & Industrial
- Rural Residential
- Rural

The amount of the UAGC is set to ensure that the total (excluding water and wastewater rates) uniform (or fixed) rates will be between 20% to 25% of total rates that are to be collected.

Differential rating category definitions

**Residential/Other properties** 

Any property that is not defined as Commercial & Industrial, Rural Residential or Rural.

#### **Commercial and Industrial**

Any property that is in a commercial or industrial zone under the District Plan or used for any business activities, except properties categorised as rural or consented for residential use, will be rated as commercial and industrial properties.

Commercial and industrial activities include, but are not restricted solely to;

- Rural and other support activities such as transport, supplies, packhouses and wineries servicing multiple clients
- Professional offices, surgeries etc.
- · All retail, wholesale merchandising activities
- All forms of manufacturing and processing
- · Bars, restaurants, cafes and other service activities
- Storage facilities
- Hotels, motels, B & B's and other short-term accommodation providers
- Tourism operations
- Care facilities operated for profit

#### **Rural Residential**

Any rating unit that would otherwise be classified as Residential, but is not connected or able to be connected to both the city water system and the city sewerage system.

#### Rural

Any rating unit with an area of 5 Hectares or more that is used predominantly for land based agricultural or farming activities.

#### Targeted Rates for specific areas and/or activities

Targeted Rates are charged to fund both operating and capital expenditure. They are charged where Council considers it desirable to separate out the funding of an activity. They are charged to rating units including those units that are separately inhabited which have access to or are deemed to benefit from the service provided. Targeted rates are a funding mechanism that may be charged for activities deemed to have either a high public or a high private good to identified properties, an area of the city or the city as a whole.

Some targeted rates are applied differentially using either land or capital values, however most targeted rates are applied on a uniform basis (same amount or rate in the dollar).

#### Lump sum contributions

Council does not normally use any lump sum contributions.

#### Fees and charges:

Fees and charges are used to fund both operating and capital expenditure.

They are applied where there is a benefit to an individual from the delivery of goods and or services and this can be charged in a cost-efficient manner. If it is possible to efficiently impose a charge, then

the Council does so, on the basis of either recovering the full cost of the service, the marginal cost added by users, or at a level that the market will pay. Fees & charges includes retail sales, ticketing, & corporate sponsorship

The following specific types of revenue are included in fees and charges:

#### Licence Fees

Licence fees are charged where applicable and may be set by Council or by regulation.

#### · Enforcement Fees including fines and infringement fees

Enforcement fees are charged where applicable. Their purpose is to promote compliance rather than to raise revenue; consequently, revenue collected may be insufficient to meet the full costs of the enforcement activity. The level of enforcement fee may also be restricted by statute or the courts. Use of enforcement fee revenue collected may also be directed to a specific purpose by statute.

#### Rental and Lease Income

Rental and lease income are attributed to the activity with primary responsibility for the asset generating the rental or lease income. This revenue generally offsets costs of maintaining the asset and costs generally within the activity area receiving the revenue. However, in the case of leasehold land subject to the Hawke's Bay Endowment Land Empowering Act 2002, ground rental revenue is credited to a special fund within equity being the HB Endowment Income Account. In accordance with the Act this income is used to fund the net cost of the Napier Inner Harbour and certain foreshore reserves and other permitted activities. The land subject to the Act was vested in Council in 1989 from the Hawke's Bay Harbour Board at the same time that Council assumed liability for the Napier Inner Harbour and former Harbour Board foreshore reserves.

#### Waste Levy Income

This is the Council share of waste levy fees collected by the Ministry for the Environment. Income is received from the Waste Levy Fund and must be applied to waste minimisation activities.

#### Interest and dividends from investments

Interest and dividends from investments are used to fund operating and capital expenditure.

Council receives interest from its investments. Interest generated from defined funds held or collected, where Council has determined that interest will be added, are credited to the fund at year end and applied to the purposes of the fund. Any remaining interest income is used to reduce the requirement for General Rates.

Council also receives a minor amount of dividend revenue from time to time. Where applicable, this is applied to offset the cost of the activity related to the dividend income. Where dividend income relates to Council operations in general, this is applied to the same purposes as general rates.

#### Borrowing

Borrowing is primarily used as a tool to smooth cash requirements for capital acquisitions and replacements, and can be used to smooth cash requirements for large one-off operating expenditure. In certain circumstances, in accordance with Council's financial strategy, borrowing may be used to fund operating expenditure.

#### Proceeds from Asset Sales

Proceeds from asset sales are used to fund operating and capital expenditure.

Council's preference is that proceeds from asset sales are used to fund capital projects, repay debt to external parties or repay internal debt, thus replenishing reserves. The main planned asset sales programme of Council is the ongoing freeholding of HB Endowment Land Residential Leases and the sale of land associated with the development and sale of sections in the Parklands residential subdivision. Council also intends to review assets for potential sale to reduce debt or replace with higher yielding investments.

#### **Development and Financial Contributions**

Proceeds from development and financial contributions are used to fund operating and capital expenditure. They are primarily to fund capital expenditure associated with growth however some operating costs such as finance costs may be funded from this source.

The existing Development Contribution policy has had limited application and as the Council has an operative Financial Contributions policy under the Resource Management Act 1991, it was decided that this was currently the preferred method of recovery of the costs relating to development. The Financial Contributions Policy will be updated as part of the review of the District Plan.

#### Grants, subsidies and donations

Revenue from these sources is actively sought to offset both operating and capital costs.

#### Petrol Tax

This is the local government share of the petrol tax levied by central government. It is used to contribute to the costs of road maintenance.

#### Other funding sources

Council continues to actively explore all possible sources of funding to assist with the funding of both operating and capital expenditure. Any other funds derived will be used to either fund capital expenditure or to reduce the amount Council collects from rates.

## Council policies in relation to various funding sources to fund operating and capital expenditure (section 103 Local Government Act 2002)

The table sets out for each activity funding sources that are to be used for both operating and capital expenditure. The rationale is explained in schedule in the appendix.

| Activity       | Funding sources                                   |   |
|----------------|---|---|
|                | Operational <sup>1</sup>                          | Capital                                   |
| Animal control | Primary source                                    | <ul> <li>Accumulated surpluses</li> </ul> |
|                | <ul> <li>Fees &amp; charges (including</li> </ul> | General Rates                             |
|                | infringement fees) 65% to 70%                     | Fees & charges                            |
|                |   | Loans                                     |
|                | Other sources                                     | Reserves                                  |
|                | General Rates                                     |   |
| Bay Skate      | Primary source                                    | <ul> <li>Accumulated surpluses</li> </ul> |
|                | <ul> <li>General Rates 60% - 70%</li> </ul>       | General Rates                             |

<sup>&</sup>lt;sup>1</sup> The stated percentages indicate the target set by Council. The actual percentages will vary from year to year as explained in the footnote at the bottom of the table in the appendix. Also subsidies, grants and donations can be considered as a possible source of funding for all activities as Council will actively seek other sources of external funding where available for both operating and capital expenditure.

| Activity  |  | sources  |

The schedule in the appendix records how the Council has applied the five considerations in the table below that it must consider when undertaking its funding needs analysis.

| Local<br>Government Act<br>2002 section | Areas of consideration | Description of the matter Council might consider  |
|---|------------------------|---|
| s.101(3)(a)(i)                          | Community outcome      | The Council determined which of its<br>community outcomes each activity primarily<br>contributes to. There may not be strong link<br>between community outcomes and funding<br>requirements for an activity   |
| s.101(3)(a)(ii)                         | Who benefits?          | What the distribution of benefits is between<br>the whole community, identifiable parts of<br>the community and individuals. Often<br>referred to as the public/private good split.   |
| s.101(3)(a)(iii)                        | Period of benefit      | For most operational expenses, the benefit is<br>received in the year the expense is incurred.<br>Some operational expenses (provisions) may<br>have a benefit over multiple years and so the<br>Council may choose to fund the activity over<br>that period. |

|                 |                          | Expenditure which results in an asset either<br>being replaced (renewals) or new assets<br>provide benefit over multiple years.  |
|-----------------|--------------------------|--|
| s.101(3)(a)(iv) | Whose acts create a need | Council used the principle that those who<br>cause additional cost either by action or<br>inaction are considered in this section. These<br>may be different groups from those who have<br>been identified within the "who benefits"<br>consideration above.<br>Often referred to as the exacerbator pays<br>principle |
| s.101(3)(a)(v)  | Separate funding         | Council considered the costs and benefits of<br>funding an activity separately, including in<br>relation to transparency and accountability. It<br>also<br>considered matters such as the financial<br>scale of the activity, administrative cost, and<br>legal requirements.  |

## **Policy Review**

The review timeframe of this policy will be no longer than every three years.

#### Appendix A

Schedule of Activity Funding Needs Analysis Section 101(3)(a) LGA

| Activity       | Community  | Who benefits?  | Period of         | Whose acts   | Separate  | Rationale   | To be     | Funding sources   |  |  |
|----------------|--|--|-------------------|--|---|---|-----------|---|--|--|
| outcome        | benefit  | create a<br>need   | funding           |  | recovered<br>from<br>Public<br>Good<br>tools <sup>2</sup>   | Operational   | Capital   |   |  |  |
| Animal control | A safe and<br>healthy city<br>that supports<br>community<br>well-being | Community as<br>a whole<br>Animal owners   | Intergenerational | All animal<br>owners<br>create the<br>need<br>however<br>irresponsible<br>owners<br>create a<br>greater cost.<br>Legislative<br>(Dog Control<br>Act) | No reason<br>identified to<br>fund the net<br>cost of this<br>activity (after<br>non rate<br>revenue<br>sources)<br>separately<br>from other<br>activities.<br>The private<br>benefit is<br>predominantly<br>funded from<br>annual dog<br>licence fees. | Animal control<br>is primarily a<br>health & safety<br>service for the<br>community &<br>therefore<br>benefits<br>everyone.<br>There are costs<br>that the Council<br>can directly<br>attribute to<br>individual<br>owners. | 30% - 35% | <ul> <li>General rates</li> <li>Fees &amp;<br/>charges<br/>(including<br/>infringement<br/>fees)</li> </ul>                         | <ul> <li>Accumulated<br/>surpluses from<br/>General rates,<br/>fees &amp; charges,</li> <li>Loans</li> <li>Reserves</li> </ul> |  |
| Bay Skate      | A vibrant<br>innovative<br>city for<br>everyone                        | Direct users,<br>local<br>businesses,<br>parents, tourists<br>and visitors<br>Community as<br>a whole as the<br>facility provides<br>a safe location | Intergenerational | Nil  | No reason<br>identified to<br>fund the net<br>cost of this<br>activity (after<br>non rate<br>revenue<br>sources)<br>separately  | Everyone has<br>the ability to<br>use the facility<br>and Council can<br>identify the<br>users  | 60% - 70% | <ul> <li>General rates</li> <li>Fees and<br/>charges<br/>(including<br/>Leases, retail<br/>sales, &amp;<br/>sponsorship)</li> </ul> | <ul> <li>Accumulated<br/>surpluses from<br/>General rates,<br/>fees &amp; charges,</li> <li>Loans</li> <li>Reserves</li> </ul> |  |

<sup>&</sup>lt;sup>2</sup> The percentages stated are the indicative target set by Council. The actual percentage may vary from year to year based on activity levels. As an example, an activity that says 100% public good may receive some revenue from fees and charges where charging is warranted to ensure the community are not inadvertently required to pay for something that only provides a benefit to an identifiable individual. Another example where the actual percentage may vary is when Council is able to obtain external grants or subsidies for a specific programme of work.

| Activity Community   | Who benefits?  | Period of  |   | Separate Rationale   | To be   | Funding sources  |   |  |         |
|----------------------|--|--|---|--|---|--|---|--|---------|
|                      | outcome  |  | benefit   | create a<br>need   | funding   |  | recovered<br>from<br>Public<br>Good<br>tools <sup>2</sup> | Operational  | Capital |
|                      |  | for users to<br>undertake their<br>sport   |   |  | from other<br>activities  |  |   |  |         |
| Building<br>consents | A safe and<br>healthy city<br>that supports<br>community<br>well-being | The property<br>owner and<br>inhabitant.<br>There is a wider<br>benefit from<br>buildings being<br>built to code | Intergenerational<br>because of the<br>life of the<br>structures for<br>which consents<br>are issued. | People<br>constructing<br>non<br>consented<br>buildings,<br>construction<br>industry<br>parties not<br>complying<br>with the<br>Building Act | Council funds<br>the cost of<br>inspecting<br>and<br>maintaining a<br>database on<br>swimming<br>pools through<br>a target rate<br>to properties<br>that have a<br>swimming<br>pool.<br>No reason<br>identified to<br>fund the net<br>cost of this<br>activity (after<br>the swimming<br>pool targeted<br>rate and other<br>non-rate<br>revenue<br>sources)<br>separately<br>from other<br>activities<br>Most activity<br>costs are<br>fundd by<br>fees from<br>applicants. | This benefits<br>the property<br>owner and<br>inhabitant.<br>There is a wider<br>benefit from<br>buildings being<br>built to code. | 20%   | <ul> <li>Fees and<br/>charges</li> <li>General rates</li> <li>Targeted rates</li> <li>Reserves</li> <li>Loans</li> </ul> | Nil     |

| Activity  | Community   | Who benefits?   | Period of<br>benefit   | Whose acts                                    | Separate   | Rationale  | To be   | Funding  | sources  |
|---|---|---|--|---|--|--|---|--|--|
|   | outcome   |   |  | create a<br>need                              | funding  |  | recovered<br>from<br>Public<br>Good<br>tools <sup>2</sup> | Operational  | Capital  |

## Key Financial Policies Consultation Plan

#### The Project

As part of the Long Term Plan (LTP) process, we have reviewed our key financial policies. We are proposing to make adjustments to four policies that affect how rates are gathered and how financial contributions for new developments are calculated. It is appropriate that these are considered together given the interconnected nature of these policies and their relevance to the LTP.

The four policies are:

- Revenue and Financing Policy
  - The Revenue and Financing Policy explains how we cover our operational and capital costs.
  - We recently updated the Revenue and Financing Policy and heard extensive submissions in the process. The changes altered the way that rates income is split between different types of properties including residential, commercial and rural. This resulted in most properties seeing a small decrease in rates, while some had an increase.
  - Financial Contributions Policy
    - The Financial Contributions Policy sets out the contributions required from property developers to help fund the cost of new infrastructure in the city.
- Rating Policy
  - The Rating Policy outlines the types of rates the Council collects (e.g. general versus targeted) and how and when these are collected.
- Rates Remission Policy
  - The Rates Remission Policy explains the circumstances where properties will be exempt from some or all of the rates they would normally incur.

#### Consultation on proposed changes

The proposed changes are as follows:

- Revenue and Financing Policy
  - Changing the way Council's housing activities are funded The change will allow this activity to be funded from other sources additional to rental income e.g. rates and loans.
- Rating Policy (information only)
  - New valuations have come in since we made changes earlier in the year to the Revenue and Financing Policy, which will impact on the rates charged for some properties. Land values have increased for commercial and industrial properties in particular.
  - Including the proposed 8% average rates increase (per rateable property), these new valuations will mean 3000 properties will have rates increases of greater than 10%, and 100 properties have increases of more than \$10,000 pa. We will directly inform these commercial and industry property owners of the impact on their rates.
  - Residential property owners, in the main, will receive a decrease due the changes of the Revenue and Financing policy, but an increase overall due to the proposed 8% average increase in 2021/22.

Consultation Plan – Key Financial Policies 29 March 2021

- Financial Contributions Policy
  - Development contributions will no longer be required and only financial contributions will be charged. This is being done to create a more robust yet simple system of financing new infrastructure.
  - Introducing new exemption categories for residential growth in the city centre and multi-unit developments to support our proposed District Plan goals.
- Rates Remission Policy
  - Several administrative amendments have been made which are designed to increase the efficiency of rates collection such as remissions on council property and changing remissions for refuse collection and recycling.

#### Significance and Engagement Policy

When considered together, the amendments to these policies are of moderate significance and are important given their relationship to the LTP. The proposed amendment to the way that housing is funded is particularly relevant given the proposal in the LTP to fund the identified shortfall in housing income through a loan. In order to apply loan funding or rates income to housing costs, a change to the Revenue and Financing Policy is first needed.

Engagement activities will inform the community and key stakeholders of the changes being made and what their likely impact will be. Feedback will be sought on the proposals with some of the proposals providing options for consideration.

#### Purpose of Communication and Engagement

The objectives of the consultation are to:

- Inform the community of the proposed changes
- Explain the likely impacts of the proposed changes
- · Seek feedback, including options that have been identified.

#### Approach

•

The amendments to these policies will be consulted on separately from the LTP. The policies impact the LTP and need to be confirmed prior to the LTP deliberations. Hearings and deliberations will be completed before the LTP hearings and deliberations.

Information will be sent to all commercial properties, property developers and other key stakeholders with links to the feedback form. Commercial ratepayers will be able to use the rates calculator to find out how the changes will affect them and property developers will be able to view the new financial contributions methodology to understand what this will mean for them.

Council housing stakeholders and tenants will be advised of the proposed change to Revenue and Financing Policy given its potential future impact on how this activity is funded. They will have the opportunity to comment on the proposed change.

#### **Consultation Timeline**

| Item                 | Submissions Open | Submissions Close | Hearing Dates |
|----------------------|------------------|-------------------|---------------|
|                      |                  |                   |               |

## 2. CONSULTATION - RATING POLICY

## 2.1 Purpose of Report

To review and update the policy to clarify amendments to the fire protection rate, storm water rate for commercial and industrial, and to present the consultation plan for approval. Any desirable changes arising from public feedback will then be incorporated, and the final policy adopted in June as part of Council's Long Term Plan 2021/31.

## **Officer's Recommendation**

That Council:

- a. Note that the unconnected (but within 100m) Fire Protection Rate for Other Rating Units remains at 50%.
- Note that the Storm Water Rate for Commercial & Industrial remains at 250% (compared to General Rate of 260%) and Rural Residential at 100% (compared to General Rate of 90%).
  - i. Note that the Storm Water Rate will not be phased over 3 years.
- c. Approve the draft Rating Policy (attached) for public consultation.
- d. Note that the draft Rating Policy may be subject to minor corrections and any changes arising from the consultation process.
- e. Approve the consultation plan for the Rating Policy.

## 2.2 Background Summary

As part of the review of the Revenue & Financing Policy February 2021, Council formalised a Rating policy that forms a bridge between the Revenue and Financing Policy and the Funding Impact Statement. As part of the Long Term Plan 2021-31 review, changes are required to align the policies as outlined.

The proposed changes to the Rating Policy will come into effect on the 1<sup>st</sup> of July 2021.

## 2.3 Issues

In response to a review of the Revenue and Financing Policy, a Rating Policy was introduced and adopted on the 16<sup>th</sup> of February 2021.

Due to significant increases being experienced for certain property types, it was agreed that General Rate differentials will be phased in over 3 years from the start of the 2021/22 ratings year. The calculation is based on the difference between the old differential (as defined in the 2020/21 Annual Plan) and the target differential, split into 3 equal stages. The schedule for phasing is as follows:

| Old<br>Differentials | Old<br>Code | Old<br>Differential<br>Rate | New Differential<br>Rate          | New<br>Code | Differential<br>Rate | 2021/22  | 2022/23  | 2023/24  |
|----------------------|-------------|-----------------------------|-----------------------------------|-------------|----------------------|----------|----------|----------|
| City<br>Residential  | 1           | 100.00%                     | Residential/Other                 | 1           | 100.00%              | 100.00%  | 100.00%  | 100.00%  |
| Commercial &         | 2           | 100.0070                    | Commercial &                      | 2           | 100.0070             | 100.0070 | 100.0070 | 100.0070 |
| Industrial           | -           | 268.09%                     | Industrial                        | -           | 260.00%              | 265.39%  | 262.70%  | 260.00%  |
| Miscellaneous        | 3           | 100.00%                     | Residential/Other<br>Commercial & | 1           | 100.00%              | 100.00%  | 100.00%  | 100.00%  |
| Miscellaneous        | 3           | 100.00%                     | Industrial                        | 2           | 260.00%              | 153.33%  | 206.67%  | 260.00%  |
| Miscellaneous        | 3           | 100.00%                     | Rural                             | 3           | 85.00%               | 95.00%   | 90.00%   | 85.00%   |
| Miscellaneous        | 3           | 100.00%                     | Rural Residential                 | 4           | 90.00%               | 96.67%   | 93.33%   | 90.00%   |
| Ex City Rural        | 4           | 63.47%                      | Residential/Other                 | 1           | 100.00%              | 75.65%   | 87.82%   | 100.00%  |

## Commercial and Industrial properties

As a result of property revaluations that occurred in December 2020 (and fell outside of the Revenue & Financing Policy review), it was identified that Commercial property had an average Land Value increase of 76.2% over the last 3 years and Industrial property had an increase of 84.4% over the same period. As the average Land Value increase for Napier is 44.5% over the last 3 years, this represents a significant increase for Commercial & Industrial property. Rate changes proposed in the Long Term Plan 2021-2031 will act in tandem with the property revaluations, with a particular impact on Commercial & Industrial property owners.

With 1,995 properties identified, Commercial & Industrial property is the second largest property group and accounts for 17% of the total Land Value for Napier (Residential property is 71% of the total Land Value).

Further information will be provided directly to these property owners with the opportunity for the community to provide feedback through the Long Term Plan process.

### Proposed changes for consultation

As there were a large number of changes adopted with the new rating system, Council is seeking guidance and confirmation on the following points:

• The unconnected rate for the Fire Protection Rate for Other Rating Units remains at 50%: Council decided to keep the unconnected water rate at 50% (rather than the proposed 70%). The Fire Protection Rate was not addressed in the resolutions.

- The Storm water Rate for Commercial and Industrial remains at 250%: this was originally in line with the proposed General Rate differential of 250%. The differential was increased to 260% but the Storm Water Rate was not.
- The Storm Water Rate for Rural Residential remains at 100%: this was originally in line with the proposed General Rate when there was no Rural Residential differential. The Rural Residential differential was introduced at 90% but the Storm Water Rate is currently 100%.

## 2.4 Significance and Engagement

Public consultation on the proposed amendments will be undertaken with the Long Term Plan 2021-2031.

## 2.5 Implications

## Financial

The impact for Council is neutral as the proposed amendments do not impact on the amount of General Rates collected.

## **Social & Policy**

The proposed changes will have a minor impact on the Rating Policy.

## Risk

Public feedback is sought prior to a final Council decision being made, particularly for the Commercial sector where revaluations have had a significant impact on this group. This will somewhat mitigate the risk inherent in adopting final General Rate differentials prior to the 2021/22 rating year.

To mitigate this risk, the Commercial ratepayers are being advised of the impacts separately, and will be invited to submit to the Long Term Plan and implications of this policy as well as all the other ratepayers of Napier City.

## 2.6 Options

The options available to Council are as follows:

- a. Accept the proposed changes to the Rating Policy for consultation.
- b. Propose alternative information for consultation.

## 2.7 Development of Preferred Option

Option a. Accept the proposed changes to the Rating Policy for consultation.

### Purpose

To assist Council in setting rates as specified within the requirements of the Local Government Act 2002 (LGA) and the Local Government (Rating) Act 2002 (LGRA).

This Policy is to be read in conjunction with the Revenue and Financing Policy, Rates Remission and Postponement Policy and Funding Impact Statement.

The Council must complete the following to set a lawful rate.

- Analysis as per s.101(3) of the Local Government Act 2002
- Adopt a Revenue and Financing Policy
- Adopt a Funding Impact Statement
- Adopt an Annual or Long Term Plan
- · Adopt a rates resolution consistent with the actions described above.

Note: to maintain rating consistency, unless otherwise stated, adopted amendments made during any rating year to this policy will only become effective with the adoption of the following Annual Plan or Long Term Plan.

### Policy

### 1. General Rates

General Rates are used to fund both operating and capital expenditure. They fund the remaining costs of Council operations after all other sources of funding have been applied.

General Rates are assessed through a combination of a Uniform Annual General Charge (UAGC) and a rate in the dollar based on land value.

Rating Policy

Version 1.1.0

Page 1 of 14

The amount of the UAGC is set to ensure that the total (excluding water and wastewater rates) uniform (or fixed) rates will be between 20% to 25% of total rates that are to be collected.

The General Rate is set differentially using matters as prescribed in Schedule 2 of the LGRA, and as listed in the Funding Impact Statement. The LGRA Schedule 2 allows councils to set a General Rate based on each of these matters.

#### General rate differentials

Rating Units assessed for the General Rate are categorised into one of four differential categories:

- Residential/Other
- Commercial & Industrial
- Rural
- Rural Residential

#### Residential/Other

Any property that is not defined as Commercial & Industrial, Rural Residential or Rural.

### Commercial & Industrial

Any property that is in a commercial or industrial zone under the District Plan or used for any business activities, except properties categorised as rural or consented for residential use, will be rated as commercial and industrial properties.

Commercial and industrial activities include, but are not restricted solely to:

- Rural and other similar activities such as transport, supplies, packhouses and wineries servicing multiple clients
- Professional offices, surgeries etc.
- All retail, wholesale merchandising activities
- All forms of manufacturing and processing
- · Bars, restaurants, cafes and other service activities
- Storage facilities
- · Hotels, motels, B & B's and other short-term accommodation providers
- Tourism operations
- Care facilities operated for profit

### Rural Residential

Any rating unit that would otherwise be classified as Residential, but is not connected or able to be connected to both the city water system and the city sewerage system.

### Rural

Any rating unit with an area of 5 Hectares or more that is used predominantly for land based agricultural or farming activities.

#### Differentials

A review of the Revenue & Financing Policy was conducted with adoption occurring in February 2021. New differentials were introduced. Based on the review, the following are the differentials to be applied based on the land value of properties in each differential category.

| Differentials | Group / Code | Differential Rate |  |
|---------------|--------------|-------------------|--|
|               |              |                   |  |

Rating Policy

Version 1.1.0

Page 2 of 14

| Residential / Other     | 1 | 100% |
|-------------------------|---|------|
| Commercial & Industrial | 2 | 260% |
| Rural                   | 3 | 85%  |
| Rural Residential       | 4 | 90%  |

Due to significant increases being experienced for certain property types, General Rate differentials will be phased in over 3 years from the start of the 2021/22 ratings year. The calculation is based on the difference between the old differential (as defined in the 2020/21 Annual Plan) and the target differential, split into 3 equal stages. The schedule for phasing is as follows:

| Old Differentials | Old<br>Code | Old<br>Differential<br>Rate | New Differential<br>Rate   | New<br>Code | Differential Rate | 2021/22 | 2022/23 | 2023/24 |
|-------------------|-------------|-----------------------------|----------------------------|-------------|-------------------|---------|---------|---------|
| City Residential  | 1           | 100.00%                     | Residential/Other          | 1           | 100.00%           | 100.00% | 100.00% | 100.00% |
| Commercial &      | 2           |                             | Commercial &               | 2           |                   |         |         |         |
| Industrial        |             | 268.09%                     | Industrial                 |             | 260.00%           | 265.39% | 262.70% | 260.00% |
| Miscellaneous     | 3           | 100.00%                     | Residential/Other          | 1           | 100.00%           | 100.00% | 100.00% | 100.00% |
|                   |             |                             | Commercial &               | 2           |                   |         |         |         |
| Miscellaneous     | 3           | 100.00%                     | Industrial                 |             | 260.00%           | 153.33% | 206.67% | 260.00% |
| Miscellaneous     | 3           | 100.00%                     | Rural                      | 3           | 85.00%            | 95.00%  | 90.00%  | 85.00%  |

| Bay View          | 6           | 72.80%                      | Rural Residential          | 4           | 90.00%            | 78.53%  | 84.27%  | 90.00%  |

The purpose of the differentials applied to the General Rate is to ensure that the amount payable by groups of ratepayers reflects Council's assessment of the relative benefit received and share of costs those groups of ratepayers should bear based on the principles outlined in the Revenue and Financing Policy.

Notes on allocation of properties into differential categories

Rating units which have no apparent land use (or are vacant properties) will be placed in the category which best suits the zoning of the property under the district plan except where the size or characteristic of the property suggest an alternative use.

To avoid doubt where a rating unit has more than one use the relevant predominant use will be used to determine the category. The predominant use relates to the main productive activity rather than just to the land area. Where there is uncertainty the land will be categorised into the highest rated category.

Rating Policy

Version 1.1.0

Page 3 of 14

Subject to the right of objection as set out in Section 29 of the Local Government (Rating) Act 2002, it shall be at the sole discretion of the Council to determine the use or predominant use of all separately rateable properties in the district.

### Uniform Annual General Charge (UAGC)

Council's Uniform Annual General Charge is set at a level that enables all Targeted Rates that are set on a uniform basis as a fixed amount, excluding those related to Water Supply and Sewage Disposal, to recover between 20% and 25% of total rates.

The charge is applied to each separately used or inhabited part of a rating unit.

### 2. Targeted Rates

Targeted Rates are charged to fund both operating and capital expenditure. They are charged where Council considers it desirable to separate out the funding of an activity. They are charged to rating units including those units that are separately inhabited which have access to or are deemed to benefit from the service provided. Targeted rates are a funding mechanism that may be charged for activities deemed to have either a high public or a high private good to identified properties, an area of the city or the city as a whole.

Some targeted rates are applied differentially using either land or capital values, however most targeted rates are applied on a uniform basis (same amount or rate in the dollar).

#### Water

#### Fire Protection Rate

This rate recovers a portion of the net costs of the water supply systems before the deduction of water by meter income.

The Fire protection targeted rate is based on the Capital Value of properties connected to, or able to be connected to, the Napier City Council water supply systems.

This rate is differentially applied, in recognition that the carrying capacity of water required in the reticulation system to protect commercial and industrial properties is greater than that required for residential properties. The rate is further differentiated where a property is not connected but is within 100 metres of a water supply system. 50% of the base rate for each differentiated category applies for each property not connected but located within 100 metres of the systems.

| Differentials   | Connected (%) | Not connected but within 100m<br>(%) |
|---|---------------|--------------------------------------|
| Central Business District and Fringe<br>Area  | 400%          | 200%                                 |
| Suburban Shopping Centres, Hotels<br>and Motels and Industrial rating units<br>outside of the CBD | 200%          | 100%                                 |
| Other Rating Units connected to or<br>able to be connected to the Council<br>water supply systems | 100%          | 50%                                  |

#### Water Rate

These rates recover the balance of the total net cost of the water supply systems after allowing for revenue collected from the Fire Protection Targeted Rate and the Water by Meter targeted rate.

The targeted rates are differentially applied and are a fixed amount set on a uniform basis, applied to each Separately Used or Inhabited Part of a Rating Unit connected to or able to be connected to, the Council's water supply system.

Rating Policy

Version 1.1.0

Page 4 of 14

The differential categories for the water rates are:

- Connected any Rating Unit that is connected to a Council system
- Service available any Rating Unit that is not connected to a Council system but is within 100 metres of such system (charged 50% of the targeted rate for connected properties)

| Differentials   | Connected (%) | Not connected but within 100m (%) |
|---|---------------|-----------------------------------|
| Rating Units connected to or able to be connected to the Council water supply systems | 1000/         | 50%                               |

### Stormwater Rate

The primary beneficiary of storm water assets are those properties that have a hard surface. There is a strong relationship between Capital Value and the hard surface area of a property.

This rate recovers the cost of storm water asset management. The Stormwater Rate is based on the Capital Value of Residential and Commercial & Industrial properties within the recognised urban limit (i.e. non-rural property as defined under the District Plan).

Rural properties are exempted.

The differential categories for Stormwater Rates are:

| Differentials           | Differential Rate within urban limits |
|-------------------------|---------------------------------------|
| Residential / Other     | 100%                                  |
| Commercial & Industrial | 250%                                  |
| Rural Residential       | 100%                                  |

### Sewerage Rate

This rate recovers the net cost of the waste water activity.

The Sewerage targeted rate is applied differentially as a fixed amount and is set on a uniform basis. It is applied to each separately used or inhabited part of a rating unit connected to, or able to be connected to, the Sewerage System.

A differential of 50% of the rate applies to each rating unit not connected but located within 30 metres of the system.

| Differentials  | Connected (%) | Not connected but<br>within 30m (%) |
|--|---------------|-------------------------------------|
| Rating units connected to or able to be connected to the City Sewerage Systems | 100%          | 50%                                 |

### Bay View Sewerage Connection Rate

The Bay View Sewerage Scheme involves reticulation and pipeline connection to the City Sewerage System. Prior to 1 November 2005, property owners could elect to connect either under a lump sum payment option, or by way of a targeted rate payable over 20 years.

Rating Policy

Version 1.1.0

Page 5 of 14

The Bay View Sewerage Connection targeted rate is a fixed amount set on a uniform basis. It is applied to each separately used or inhabited part of a rating unit connected to the Bay View Sewerage Scheme, where the lump sum payment option was not elected.

The rate applies from 1 July following the date of connection for a period of 20 years, or until such time as a lump sum payment for the cost of connection is made.

The category of rateable land for setting the targeted rate is defined as the provision of a service to those properties that are connected to the sewerage system, but have not paid the lump sum connection fee.

### Refuse & Recycling

#### Refuse Collection and Disposal Rate

This rate recovers the cost of the kerbside refuse collection service, including an allocation of the cost of Council support services.

The Refuse Collection and Disposal targeted rate of a fixed amount is set on a uniform basis. It is applied to each separately used or inhabited part of a rating unit for which a rubbish collection service is available and is multiplied by number of times each week the service is provided. Rating units which Council officers determine are unable to practically receive the Council service and have an approved alternative service will be charged the waste service charge that excludes the approved alternative service.

#### Kerbside Recycling Rate

This rate recovers the net cost of the kerbside recycling collection service, including an allocation of the cost of Council support services.

The Kerbside Recycling targeted rate of a fixed amount is set on a uniform basis. It is applied to each separately used or inhabited part of a rating unit for which the kerbside recycling collection service is available. Rating Units which Council officers determine are unable to practically receive the Council service and have an approved alternative service will be charged the waste service charge that excludes the approved alternative service.

#### Off Street Car Parking Rates

### **CBD Off Street Car Parking Rate**

This rate is used to provide additional off street car parking in the Central Business District. Those commercial rating units in the mapped areas identified as the Central Business District Off Street Car Parking 100% and 50% Parking Dispensation areas are charged the CBD Off Street Parking targeted rate based on land value. This rate is set on a differential basis as follows:

| Differentials  | %    |
|--|------|
| Properties where council provides additional parking due to the property receiving a 100% parking dispensation | 100% |
| Properties where council provides additional parking due to the property receiving a 50% parking dispensation. | 50%  |

Refer Council maps:

- CBD Off Street Car Parking 100% Parking Dispensation Area
- CBD Off Street Car Parking 50% Parking Dispensation Area

### Taradale Off Street Car Parking Rate

This rate is used to provide additional off street car parking in the Taradale Suburban Commercial area.

Those commercial rating units in the Taradale Suburban Commercial area only are charged the Taradale Off Street Parking targeted rate based on land value and set on a uniform basis.

Rating Policy

Version 1.1.0

Page 6 of 14

#### Suburban Off Street Car Parking Rate

This rate is used to provide additional off street car parking at each of these areas served by Council supplied off street car parking, and to maintain the existing off street car parking areas.

Those commercial rating units in suburban shopping centres and those commercial properties located in residential areas which are served by Council supplied off street car parking are charged the Suburban Shopping Centre Off Street Parking targeted rate based on land value and set on a uniform basis.

#### Promotion Rates

### **CBD** Promotion Rate

This rate recovers at least 70% of the cost of the promotional activities run by Napier City Business Inc. The remainder is met from general rates to reflect the wider community benefit of promoting the CBD to realise its full economic potential.

Each commercial and industrial rating unit situated within the area as defined on Council map "CBD Promotion Rate Area" are charged the CBD Promotion targeted rate based on land value and set on a uniform basis.

### Taradale Promotion Rate

This rate recovers the full cost of the Taradale Marketing Association's promotional activities. All rating units in the Taradale Suburban Commercial area are charged the Taradale Promotion targeted rate based on land value and set on a uniform basis.

### Other Rates and Charges

### Swimming Pool Safety Rate

This rate recovers the cost of pool inspections and related costs to ensure owners meet the legal requirements of the Building Act 2004 and Building (Pools) Amendment Act 2016. A targeted rate of a fixed amount set on a uniform basis, applied to each rating unit where a residential pool or small heated pool (within the meaning of the Building (Pools) Amendment Act 2016) is subject to a 3 yearly pool inspection.

#### Water By Meter Charges

This rate applies to all with a water meter and is charged based on a scale of charges as shown on the schedule of indicative rates each year.

Where any rating unit is suspected to have above average water usage Council officers may require that a water meter is installed and excess usage is charged based the water by meter targeted rate.

The rate based on actual water use above the first 300m<sup>3</sup> per SUIP per annum applies to select metered properties.

### **Targeted Rates Note:**

For the purposes of Schedule 10, clause 15(4)(e) or clause 20(4)(e) of the Local Government Act 2002, lump sum contributions will not be invited in respect of targeted rates, unless this is provided within the description of a particular targeted rate.

### 3. Separately Used or Inhabited Parts of a Rating Unit Definition

### Definition

For the purposes of the Uniform Annual General Charge and all uniform (or fixed value) Targeted Rates, a separately used or inhabited part of a rating unit is defined as: Any part of a rating unit that is, or is able to be, separately used or inhabited by the owner or by any other person or body having the right to use or inhabit that part by virtue of a tenancy, lease, licence or other agreement.

Rating Policy

Version 1.1.0

Page 7 of 14

This definition includes separately used parts, whether or not actually occupied at any particular time, which are provided by the owner for rental (or other forms of occupation) on an occasional or long term basis by someone other than the owner.

Examples of separately used or inhabited parts of a rating unit include:

- For residential rating units, each consented supplementary unit is considered a separately used or inhabited part. Each situation is assessed on its merits.
- Residential properties, where a separate area that is available to be used as an area independent to the rest of the dwelling is used for the purpose of operating a business, such as a professional practice, dedicated shop\display area or trade workshop. The business area is considered a separately used or inhabited part.
- For commercial or industrial properties, two or more different businesses operating from or making separate use of the different parts of the rating unit. Each separate business is considered a separately used or inhabited part. A degree of common area would not necessarily negate the separate parts.
- Where a single business comprises multiple buildings, or multiple floors of a single building, each building or floor of a multi-story building is deemed to constitute a separate part (SUIP).

These examples are not inclusive of all situations.

## Key Financial Policies Consultation Plan

### The Project

As part of the Long Term Plan (LTP) process, we have reviewed our key financial policies. We are proposing to make adjustments to four policies that affect how rates are gathered and how financial contributions for new developments are calculated. It is appropriate that these are considered together given the interconnected nature of these policies and their relevance to the LTP.

The four policies are:

- Revenue and Financing Policy
  - The Revenue and Financing Policy explains how we cover our operational and capital costs.
  - We recently updated the Revenue and Financing Policy and heard extensive submissions in the process. The changes altered the way that rates income is split between different types of properties including residential, commercial and rural. This resulted in most properties seeing a small decrease in rates, while some had an increase.
  - Financial Contributions Policy
    - The Financial Contributions Policy sets out the contributions required from property developers to help fund the cost of new infrastructure in the city.
- Rating Policy
  - The Rating Policy outlines the types of rates the Council collects (e.g. general versus targeted) and how and when these are collected.
- Rates Remission Policy
  - The Rates Remission Policy explains the circumstances where properties will be exempt from some or all of the rates they would normally incur.

### Consultation on proposed changes

The proposed changes are as follows:

- Revenue and Financing Policy
  - Changing the way Council's housing activities are funded The change will allow this activity to be funded from other sources additional to rental income e.g. rates and loans.
- Rating Policy (information only)
  - New valuations have come in since we made changes earlier in the year to the Revenue and Financing Policy, which will impact on the rates charged for some properties. Land values have increased for commercial and industrial properties in particular.
  - Including the proposed 8% average rates increase (per rateable property), these new valuations will mean 3000 properties will have rates increases of greater than 10%, and 100 properties have increases of more than \$10,000 pa. We will directly inform these commercial and industry property owners of the impact on their rates.
  - Residential property owners, in the main, will receive a decrease due the changes of the Revenue and Financing policy, but an increase overall due to the proposed 8% average increase in 2021/22.

Consultation Plan – Key Financial Policies 29 March 2021

- Financial Contributions Policy
  - Development contributions will no longer be required and only financial contributions will be charged. This is being done to create a more robust yet simple system of financing new infrastructure.
  - Introducing new exemption categories for residential growth in the city centre and multi-unit developments to support our proposed District Plan goals.
- Rates Remission Policy
  - Several administrative amendments have been made which are designed to increase the efficiency of rates collection such as remissions on council property and changing remissions for refuse collection and recycling.

#### Significance and Engagement Policy

When considered together, the amendments to these policies are of moderate significance and are important given their relationship to the LTP. The proposed amendment to the way that housing is funded is particularly relevant given the proposal in the LTP to fund the identified shortfall in housing income through a loan. In order to apply loan funding or rates income to housing costs, a change to the Revenue and Financing Policy is first needed.

Engagement activities will inform the community and key stakeholders of the changes being made and what their likely impact will be. Feedback will be sought on the proposals with some of the proposals providing options for consideration.

#### Purpose of Communication and Engagement

The objectives of the consultation are to:

- Inform the community of the proposed changes
- Explain the likely impacts of the proposed changes
- · Seek feedback, including options that have been identified.

#### Approach

•

The amendments to these policies will be consulted on separately from the LTP. The policies impact the LTP and need to be confirmed prior to the LTP deliberations. Hearings and deliberations will be completed before the LTP hearings and deliberations.

Information will be sent to all commercial properties, property developers and other key stakeholders with links to the feedback form. Commercial ratepayers will be able to use the rates calculator to find out how the changes will affect them and property developers will be able to view the new financial contributions methodology to understand what this will mean for them.

Council housing stakeholders and tenants will be advised of the proposed change to Revenue and Financing Policy given its potential future impact on how this activity is funded. They will have the opportunity to comment on the proposed change.

### **Consultation Timeline**

| Item                 | Submissions Open | Submissions Close | Hearing Dates |
|----------------------|------------------|-------------------|---------------|
|                      |                  |                   |               |
| Revenue and          | 12 April         | 12 May            | 1 June        |
| Financing Policy     |                  |                   |               |
| Financial            | 12 April         | 12 May            | 1 June        |
| Contributions Policy |                  |                   |               |
| Rating Policy        | 12 April         | 12 May            | 1 June        |
| Rates Remission      | 12 April         | 12 May            | 1 June        |
| Policy               |                  |                   |               |

### **Communication & Engagement Tools**

The consultation process will be promoted through digital and print channels with notification of the consultation provided directly to commercial ratepayers.

## 3. REVIEW - RATES REMISSION AND POSTPONEMENT ON MÃORI FREEHOLD LAND

| Type of Report:             | Legal and Operational                            |
|-----------------------------|--|
| Legal Reference:            | Local Government Act 2002                        |
| Document ID:                | 1301033  |
| Reporting Officer/s & Unit: | Garry Hrustinsky, Investment and Funding Manager |

## 3.1 Purpose of Report

The purpose of this report is to review the Rates Remission and Postponement on Māori Freehold Land policy (*Doc ID 1301531*).

## **Officer's Recommendation**

That Council:

- a. Adopt the current Rates Remission and Postponement on Māori Freehold Land policy with no changes.
- Note that amendments proposed in the Local Government (Rating of Whenua Māori) Amendment Bill will impact on the Local Government (Rating) Act 2002 from 1 July 2021 if it receives Royal Assent.

## 3.2 Background Summary

The Rates Remission and Postponement on Māori Freehold Land policy must be reviewed no longer than every three years. The last review was performed on 29 June 2018.

## 3.3 Issues

No issues.

## 3.4 Significance and Engagement

Changes to the policy require public consultation. No changes are recommended in this review.

## 3.5 Implications

## Financial

There are no financial implications.

## **Social & Policy**

Napier City Council has very few known rating units that occupy Māori freehold land. Changes proposed in the Local Government (Rating of Whenua Māori) Amendment Bill state that this policy must support the principles set out in the Preamble to Te Ture Whenua Maori Act 1993. However, the target date for the Bill becoming law is 1 July 2021.

## Risk

Risk is considered very low.

## 3.6 Options

The options available to Council are as follows:

- a. Accept the policy with no recommended changes.
- b. Request changes be made to the policy.

## 3.7 Development of Preferred Option

The preferred option has been developed in review of the current policy, a review of Māori freehold land to identify whether any significant changes have occurred over the last three years, and with consideration for the Local Government (Rating of Whenua Māori) Amendment Bill.

## 3.8 Attachments

| NCC Documents Referenced      | Reviewed between March 2021 the Long Term Plan 2021-2031      |                             |     |

### Purpose

To enable Council to remit all or part of the rates or postpone the requirement to pay all or part of the rates on Māori freehold land under Part 4 of the Local Government (Rating) Act 2002, where a policy on the remission and postponement of rates on Māori freehold land has been adopted and the conditions and criteria in the policy are met.

Under Section 102 of the Local Government Act 2002 Council must adopt a policy on the remission and postponement of rates on Māori freehold land.

### Policy

Napier City Council has very few known rating units that occupy Māori freehold land. Council considers no criteria or conditions exist which requires rates relief on Māori freehold land additional to or which differs from rates remissions or postponement policies which apply to all rateable properties within Napier.

### **Policy Review**

The review timeframe on this policy will be no longer than every three years.

Document ID TBA Version 2.0.1

Page 1 of 1

## 4. CONSULTATION - RATES REMISSION POLICY

| Type of Report:             | Legal and Operational                        |  |
|-----------------------------|--|--|
| Legal Reference:            | Local Government (Rating) Act 2002           |  |
| Document ID:                | 1300033                                      |  |
| Reporting Officer/s & Unit: | Adele Henderson, Director Corporate Services |  |

## 4.1 Purpose of Report

To review and update the policy to clarify delegations, remove the Remission for Residential Land in Commercial or Industrial Areas, and present the consultation plan for approval.

## **Officer's Recommendation**

That Council:

- a. Approve the proposed removal of the Remission for Residential Land in Commercial or Industrial Areas.
- b. Approve the delegation of sign-off for the Remission of Refuse Collection and/or Kerbside Recycling Targeted Rates to the Chief Financial Officer.
- c. Approve the consultation plan for the Rates Remission Policy.

## 4.2 Background Summary

Further review of the Rates Postponement Policy has identified that the Remission for Residential Land in Commercial or Industrial Areas is redundant. Residential land in commercial or industrial areas is treated as residential property for rating purposes. No remission is required. The provision proposed for removal reads as follows:

## "Remission for Residential Land in Commercial or Industrial Areas

## Objective

To ensure that owners of rating units situated in commercial or industrial areas are not unduly penalised by the zoning decisions of this Council and previous local authorities.

## Conditions and Criteria

To qualify for remission under this part of the policy the rating unit must:

- Be situated within an area of land that has been zoned for commercial or industrial use. Ratepayers can determine where their property has been zoned by inspecting the City of Napier District Plan, copies of which are available from the Council office.
- Be listed as a 'residential' property for differential rating purposes. Ratepayers wishing to ascertain whether their property is treated as a residential property may inspect the Council's rating information database at the Council office.
- Be residential construction with a Building Consent that has been granted under Section 49 of the Building Act 2004.

Ratepayers wishing to claim remission under this part of the policy must make an application in writing addressed to the Chief Financial Officer.

The application for rates remission must be made to the Council by the 30<sup>th</sup> of April prior to the commencement of the rating year. Applications received during a rating year will be applicable from the commencement of the following rating year. Applications will not be backdated.

The amount remitted will be the difference between the rates calculated on a Residential differential and a Commercial and Industrial differential".

The Remission of Refuse Collection and/or Kerbside Recycling Targeted Rates does not currently have a delegation for sign-off. To provide clarity, it is proposed that advice of application come from Environmental Solutions to the Chief Financial Officer for sign-off.

The proposed inclusion is as follows:

Applications must be made to Environmental Solutions. Applications will be advised to the Chief Financial Officer for approval.

### 4.3 Issues

There is no significant issue for retaining a Remission for Residential Land in Commercial or Industrial Areas. However, the remission will remain unused.

At present there is insufficient clarity regarding delegation on who can sign off Remission of Refuse Collection and/or Kerbside Recycling Targeted Rates. Final authorisation should remain within the Finance Department (and Chief Financial Officer) as this is where rating matters reside.

A Remission for Council Property is required as an accounting adjustment is currently performed to adjust/allow for the additional Council rates. In practical terms the proposed remission will allow Council to properly rate Council property, then apply a credit to total rates representing Council rates. This is a simpler approach that will also increase transparency for reporting purposes.

### 4.4 Significance and Engagement

There has been no external consultation on the proposed changes. If approved, public consultation will be required and undertaken as a separate consultation in parallel with the Long Term Plan 2021-2031.

### 4.5 Implications

### Financial

There is no financial implication for the proposed amendments highlighted in this report.

Council provides a budget for rates remission in our Annual Plan and Long Term Plan. The amount budgeted is not significant (<0.5% of total rates).

### Social & Policy

This is a proposed policy amendment. Social implications are negligible.

### Risk

Beyond clarifying internal procedures, the implications of accepting or rejecting the proposed amendments are low.

### 4.6 Options

The options available to Council are as follows:

- a. Accept all of the proposed changes.
- b. Accept selected proposed changes / make amendments.

c. Accept none of the proposed changes.

## 4.7 Development of Preferred Option

Approve the proposed removal of the Remission for Residential Land in Commercial or Industrial Areas.

Approve the delegation of sign-off for the Remission of Refuse Collection and/or Kerbside Recycling Targeted Rates to the Chief Financial Officer.

## Approve the consultation plan for the Rates Remission Policy.

### Purpose

To enable Council to remit all or part of the rates on a rating unit under Section 85 of the Local Government (Rating) Act 2002 where a Rates Remission Policy has been adopted and the conditions and criteria in the policy are met.

### Policy

#### 1. Remission of Penalties

### Objective

The objective of this part of the Rates Remission Policy is to enable Council to act fairly and reasonably in its consideration of rates which have not been received by the Council by the penalty date due to circumstances outside the ratepayer's control.

Conditions and Criteria

Penalties incurred will be automatically remitted where Council has made an error which results in a penalty being applied.

Remission of one penalty will be considered in any one rating year where payment has been late due to significant family disruption. This will apply in the case of death, illness, or accident of a family member, at about the times rates are due.

Remission of the penalty will be considered if the ratepayer forgets to make payment, claims a rates invoice was not received, is able to provide evidence that their payment has gone astray in the post, or the late payment has otherwise resulted from matters outside their control. Each application will be considered on its merits and remission will be granted where it is considered just and equitable to do so

Rates Remission Policy

Document ID TBA

Version 4.2.0

Page 1 of 5

Remission of a penalty will be considered where sale has taken place very close to due date, resulting in confusion over liability, and the notice of sale has been promptly filed, or where the solicitor who acted in the sale for the owner acted promptly but made a mistake (e.g. inadvertently provided the wrong name and address) and the owner cannot be contacted. Each case shall be treated on its merits.

Penalties will also be remitted based on the application, by officers, of Council criteria established after Council has identified that Significant Extraordinary Circumstances have occurred that warrants further leniency in relation to the enforcement of penalties that would otherwise have been payable. The criteria to be applied will be set out in a council resolution that will be linked to the specific Significant Extraordinary Circumstances that have been identified by Council.

Penalties will also be remitted where Council's Chief Financial Officer considers a remission of the penalty, on the most recent instalment, is appropriate as part of an arrangement to collect outstanding rates from a ratepayer.

### 2. Remission for Farmland Under 5 Hectares

### Objective

To provide rates relief for farms where a Rating Unit is less than 5 hectares.

#### Conditions and Criteria

- The Rating Unit must be used predominantly for land based agriculture or farming activities.
- Remission will be revoked where a change in land use has occurred.

The amount remitted will be the difference between the rates calculated on a Residential or Semi-Rural differential and a Rural differential.

Ratepayers wishing to claim remission under this part of the policy must make an application in writing addressed to the Chief Financial Officer.

The application for rates remission must be made to Council by the 30<sup>th</sup> of April prior to the commencement of the rating year. Any remission for applications received during a rating year will be applicable from the commencement of the following rating year. Remissions will not be backdated. Declarations must be renewed every 3 years.

### 3. Remission of Refuse Collection and/or Kerbside Recycling Targeted Rates

#### Objective

To enable Council to provide rates remission where, refuse collection or kerbside recycling services are not able to be provided, or where a ratepayer receives a reduced service.

### Conditions and Criteria

- Remission of part of the charge may be provided where a Council service is not provided or where Council officers have approved an alternative service.
- Remission of part of the charge be provided where a ratepayer applies for a reduced service, and a Council officer deems a reduced service to be appropriate. Under this condition, Refuse Collection may be reduced from a weekly service to a fortnightly service (or from a thrice-weekly service to a weekly service for properties within the CBD).
- Applications for remission must be made in writing by the ratepayer or their authorised agent.
- Remission may be revoked where a change in service has occurred.

Applications must be made to Environmental Solutions. Applications will be advised to the Chief Financial Officer for approval.

#### 4. Remission for Residential Properties Used Solely as a Single Residence

### Objective

Rates Remission Policy

Document ID TBA

Version 4.2.0

Page 2 of 5

To enable Council to provide rates remission where properties that are identified as having separately used or inhabited portions are used solely as a single family residence.

#### Conditions and Criteria

Applications for rates remission must be made in writing by the ratepayer or their authorised agent.

A signed declaration must be provided to Council stating that the properties are used as a single family residence. The application must be made to Council by the 30<sup>th</sup> of April prior to the commencement of the rating year. Any remission for applications received during a rating year will be applicable from the commencement of the following rating year. Remissions will not be backdated. Declarations must be renewed every 3 years.

Accommodation arrangements must not be for pecuniary benefit.

### 5. Remission for Water Rates (by meter)

#### Objective

To provide ratepayers with a measure of relief by way of partial rates remission where, as a result of the existence of a water leak on the Rating Unit which they occupy the payment of fuller rates is inequitable, or where officers are convinced that there are errors in the data relating to water usage.

#### **Conditions and Criteria**

- The existence of a significant leak on the occupied Rating Unit has been established and there is
  evidence that steps have been taken to repair the leak as soon as possible after the detection, or
  officers have reviewed the usage data and are convinced that the usage readings are so abnormal
  as to require adjustment.
- The Council or its delegated officer(s) as determined from time to time and set out in the Council's delegations register shall determine the extent of any remission based on the merits of each situation.
- 6. Remission to smooth the effects of change in rates on individual or groups of properties

### Objective

To enable Council to provide rates remission where, as a result of a change in Council policy results in a significant increase in rates, Council decides it is equitable to smooth or temporarily reduce the impacts of the change by reducing the amount payable.

The Council considers a significant increase to be 25% or more over the current assessed rates for a single property.

### **Conditions and Criteria**

 Remission of part of the value based rates to enable the impact of a change in rates to be phased in over a period of no more than 3 years.

To continue with any existing rates adjustment where, due to change in process, policy or legislation Council considers it equitable to do so subject to a maximum limit of 3 years to a remission made under this clause in the policy.

### 7. Remission for Special Circumstances

#### Objective

To enable Council to provide rates remission for special and unforeseen circumstances (including Significant Natural Areas (SNAs) where appropriate), where it considers relief by way of rates remission is justified in the circumstances.

Conditions and Criteria Rates Remission Policy

Document ID TBA

Version 4.2.0

Page 3 of 5

Applications for rates remission must be made in writing by the ratepayer or their authorised agent.

Each circumstance will be considered by Council on a case by case basis. Where necessary, Council consideration and decision will be made in the Public Excluded part of a Council meeting.

The terms and conditions of remission will be decided by Council on a case by case basis. The applicant will be advised in writing of the outcome of the application.

### 8. Remission of Rates in Response to Significant Extraordinary Circumstances being identified by Council.

#### Objective

To enable Council to provide rates remission to assist ratepayers in response to Significant Extraordinary Circumstances impacting Napier's ratepayers.

### Definitions

Financial Hardship: for the purpose of this provision is defined as the inability of a person, after seeking recourse from Government benefits or applicable relief packages, to reasonably meet the cost of goods, services and financial obligations that are considered necessary according to New Zealand standards. In the case of a ratepayer who is not a natural person, it is the inability, after seeking recourse from Government benefits or applicable relief packages, to reasonably meet the cost of goods, services and financial obligations that are considered essential to the functioning of that entity according to New Zealand standards.

### Conditions and Criteria

For this policy to apply Council must first have identified that there have been Significant Extraordinary Circumstances affecting the ratepayers of Napier, that Council wishes to respond to.

Once Significant Extraordinary Circumstances have been identified by Council, the criteria and application process (including an application form, if applicable), will be made available.

For a Rating Unit to receive a remission under this policy it needs to be an "Affected Rating Unit" based on an assessment performed by officers, following guidance provided through a resolution of Council.

Council resolution will include:

- 1. That the resolution applies under the Rates Remission Policy; and
- 2. Identification of the Significant Extraordinary Circumstances triggering the policy (including both natural and man-made events); and
- How the Significant Extraordinary Circumstances are expected to impact the community (e.g. financial hardship); and
- 4. The type of Rating Unit the remission will apply to; and
- Whether individual applications are required or a broad based remission will be applied to all affected Rating Units or large groups of affected Rating Units; and
- 6. What rates instalment/s the remission will apply to; and
- Whether the remission amount is either a fixed amount, percentage, and/or maximum amount to be remitted for each qualifying Rating Unit.

#### Explanation

The specific response and criteria will be set out by Council resolution linking the response to specific Significant Extraordinary Circumstances. The criteria may apply a remission broadly to all Rating Units or to specific groups or to Rating Units that meet specific criteria such as proven Financial Hardship, a

Rates Remission Policy

Document ID TBA

Version 4.2.0

Page 4 of 5

percentage of income lost or some other criteria as determined by council and incorporated in a council resolution.

Council will indicate a budget to cover the value of remissions to be granted under this policy in any specific financial year.

The types of remission that may be applied under this policy include:

- The remission of a fixed amount per Rating Unit either across the board or targeted to specific groups such as:
  - A fixed amount per residential Rating Unit
  - A fixed amount per commercial Rating Unit

### **Policy Review**

This policy will be reviewed at least once every three years.

Page 5 of 5

## Key Financial Policies Consultation Plan

### The Project

As part of the Long Term Plan (LTP) process, we have reviewed our key financial policies. We are proposing to make adjustments to four policies that affect how rates are gathered and how financial contributions for new developments are calculated. It is appropriate that these are considered together given the interconnected nature of these policies and their relevance to the LTP.

The four policies are:

- Revenue and Financing Policy
  - The Revenue and Financing Policy explains how we cover our operational and capital costs.
  - We recently updated the Revenue and Financing Policy and heard extensive submissions in the process. The changes altered the way that rates income is split between different types of properties including residential, commercial and rural. This resulted in most properties seeing a small decrease in rates, while some had an increase.
  - Financial Contributions Policy
    - The Financial Contributions Policy sets out the contributions required from property developers to help fund the cost of new infrastructure in the city.
- Rating Policy
  - The Rating Policy outlines the types of rates the Council collects (e.g. general versus targeted) and how and when these are collected.
- Rates Remission Policy
  - The Rates Remission Policy explains the circumstances where properties will be exempt from some or all of the rates they would normally incur.

#### Consultation on proposed changes

The proposed changes are as follows:

- Revenue and Financing Policy
  - Changing the way Council's housing activities are funded The change will allow this activity to be funded from other sources additional to rental income e.g. rates and loans.
- Rating Policy (information only)
  - New valuations have come in since we made changes earlier in the year to the Revenue and Financing Policy, which will impact on the rates charged for some properties. Land values have increased for commercial and industrial properties in particular.
  - Including the proposed 8% average rates increase (per rateable property), these new valuations will mean 3000 properties will have rates increases of greater than 10%, and 100 properties have increases of more than \$10,000 pa. We will directly inform these commercial and industry property owners of the impact on their rates.
  - Residential property owners, in the main, will receive a decrease due the changes of the Revenue and Financing policy, but an increase overall due to the proposed 8% average increase in 2021/22.

Consultation Plan – Key Financial Policies 29 March 2021

- Financial Contributions Policy
  - Development contributions will no longer be required and only financial contributions will be charged. This is being done to create a more robust yet simple system of financing new infrastructure.
  - Introducing new exemption categories for residential growth in the city centre and multi-unit developments to support our proposed District Plan goals.
- Rates Remission Policy
  - Several administrative amendments have been made which are designed to increase the efficiency of rates collection such as remissions on council property and changing remissions for refuse collection and recycling.

#### Significance and Engagement Policy

When considered together, the amendments to these policies are of moderate significance and are important given their relationship to the LTP. The proposed amendment to the way that housing is funded is particularly relevant given the proposal in the LTP to fund the identified shortfall in housing income through a loan. In order to apply loan funding or rates income to housing costs, a change to the Revenue and Financing Policy is first needed.

Engagement activities will inform the community and key stakeholders of the changes being made and what their likely impact will be. Feedback will be sought on the proposals with some of the proposals providing options for consideration.

#### Purpose of Communication and Engagement

The objectives of the consultation are to:

- Inform the community of the proposed changes
- Explain the likely impacts of the proposed changes
- · Seek feedback, including options that have been identified.

#### Approach

•

The amendments to these policies will be consulted on separately from the LTP. The policies impact the LTP and need to be confirmed prior to the LTP deliberations. Hearings and deliberations will be completed before the LTP hearings and deliberations.

Information will be sent to all commercial properties, property developers and other key stakeholders with links to the feedback form. Commercial ratepayers will be able to use the rates calculator to find out how the changes will affect them and property developers will be able to view the new financial contributions methodology to understand what this will mean for them.

Council housing stakeholders and tenants will be advised of the proposed change to Revenue and Financing Policy given its potential future impact on how this activity is funded. They will have the opportunity to comment on the proposed change.

### **Consultation Timeline**

| Item                 | Submissions Open | Submissions Close | Hearing Dates |
|----------------------|------------------|-------------------|---------------|
|                      |                  |                   |               |

## 5. DRAFT FINANCIAL CONTRIBUTIONS POLICY

### 5.1 Purpose of Report

The purpose of this report is to provide detail around the Financial Contributions Policy, and recommend that the draft Policy be approved for public consultation. Any desirable changes arising from public feedback will then be incorporated, and the final policy adopted in June as part of Council's Long Term Plan 2021/31.

### **Officer's Recommendation**

That Council:

- a. Approve the draft Financial Contributions Policy (*Doc ID 1301563 attached*) for public consultation.
- b. Note that the draft Financial Contributions Policy may be subject to minor corrections and any changes arising from the consultation process.
- c. Note that a final Financial Contributions Policy will be adopted in June 2021.
- d. Approve the attached consultation plan for the Financial Contributions Policy

### 5.2 Background Summary

Section 102 of the Local Government Act, requires Council to adopt funding and financial policies including a policy on development or financial contributions.

Through Council workshops and the review of the existing policy, Council wish to move to a Financial Contributions policy. In addition, include remission/waiver options for certain types of residential development in the CBD and/or CBD fringe.

This approach is now outlined in a concise draft financial contributions policy that will be consulted in parallel to the LTP consultation process.

## 5.3 Issues

Council are currently charging financial contributions for both residential and nonresidential developments under the existing provisions in the District Plan. To do this, we are noting variances to the current Financial and Development Contributions Policy for non-residential developments. A full review of the Policy has been undertaken to provide a sound basis for charging going forward, noting that growth is increasing across the city. The recommended approach, which is to continue to charge financial contributions under the existing provisions in the District Plan, follows an extensive review completed by infrastructure consultants, Utility Ltd, over the last six months.

### 5.4 Significance and Engagement

Engagement on the proposed revised policy changes will be undertaken as a separate consultation concurrently with the Long Term Plan for community feedback.

### 5.5 Implications

### Financial

NCC currently does not have any growth-related debt. This is most likely due to a combination of reasons, and there is limited value in revisiting previous cost allocations.

The purpose of the contributions is to fund the growth/capacity capital cost of infrastructure for future development. These costs are projected to be around \$105M over the next 10 years of which \$40m will be debt funded to support growth at the end of the 10 years (excluding financing costs). Managing the timing of the infrastructure investments will be an important consideration.

Some of these costs will be funded from development that occurs outside the 10 year period covered by the 2021 LTP.

The estimated revenue over the 10 year LTP period is between \$50M and \$65M, depending on where and when the development occurs. The uptake in areas where an exemption may apply will also affect this revenue.

Although exemptions have been identified as part of this new policy, it is anticipated that any new residential development in commercial areas will not require any further network upgrades to accommodate this growth. For this reason we have not quantified lost revenue from exemptions.

### **Social & Policy**

Growth projections suggest that up to 4,600 new residential units may be required in Napier over the next 30 years. This is an increase of around 20% from the current 26,000 houses. This demand is to be met by infill/intensification, existing structure plan/greenfield areas (Te Awa, Parklands, Mission Development) and potential further greenfield development.

The incentives proposed in the policy and discussed below as the preferred option, will contribute to the delivery of Council's strategic objective of a 'Vibrant City Centre' and promote inner city living. These incentives will also promote a 'compact city" by encouraging multi-unit developments in areas that are within walking distance from neighbourhood commercial centres across Napier.

We are proposing to continue to charge financial contributions under the existing Financial Contributions section of the District plan.

### Risks

The key risks of the recommended approach are:

- The existing District Plan provisions mean there are potential limitations on the quantum of contributions for large non-residential developments.
- The exemptions will reduce the financial contribution revenue that Council receive, however this is off-set by the benefits from in-fill and intensification development. Typically, existing infrastructure has been provisioned to accommodate more growth in the city centres, or the change in land use does not create a significant increase in demand of services.

## 5.6 Options

The options available to Council are as follows:

- a. Maintain the existing Development and Financial Contributions policy.
- b. Adopt a financial contribution policy.
- c. Adopt a financial contribution policy, with a wide range of exemptions.
- d. Adopt a financial contribution policy, with specific exemptions within certain locations.

## 5.7 Development of Preferred Option

The preferred option is d. Adopt a financial contribution policy, with specific exemptions within certain locations.

Financial Contributions will be charged using the existing conditions in section 65 of the District Plan, however Council will modify the amount required in certain circumstances to encourage more intensive residential development around existing commercial areas.

Council wishes to encourage residential growth in certain areas in order to revitalise the city centres. Therefore, the exemptions to financial contributions detailed in Section 1.7 have been included in the draft policy. These are considered to be a simple and equitable means of achieving Council's strategic objectives related to providing capacity for housing development, and balancing the needs of funding for infrastructure.

The exemptions are listed below.

## **City Centre**

Council wishes to encourage residential growth in certain areas in order to revitalise the city centres. Accordingly, the exemptions to financial contributions below shall apply for the following developments:

- 1. A new residential unit within the Art Deco Quarter and Inner City Commercial Zone within an existing gross floor area shall be exempt 80% of the financial contribution. Any new residential unit in addition to the existing floor area will be exempt by 50%. This reflects the fact that where a conversion development occurs within the existing built city environment, there is not always an established link between residential activity and an increased demand on services like 3-waters and transportation. However, there is an increase in demand for community infrastructure and parks/reserves, and from the new floor area that did not previously exist.
- 2. Any multi-unit residential development within Fringe Commercial Zone and Taradale Suburban Commercial Zone shall be exempt 50% of the financial contribution.
- 3. Any multi-unit residential development within the main commercial centres in Marewa, Napier South, Onekawa, Greenmeadows, Maraenui, Taradale and Tamatea (as per map attached in draft Financial Contribution Policy) shall be assessed based on the number of bedrooms in each apartment/unit. This is considered a fair way to reflect the lower demand typically created by smaller apartments compared to a residential dwelling. The exemptions shall be:

| • | One bedroom unit | 50% exemption |
|---|------------------|---------------|
|---|------------------|---------------|

- Two bedroom unit 33% exemption
- Three or more bedroom unit 0% exemption

The greater of the above exemptions shall be applied, however, a single development may only be granted one exemption. The approval of an exemption should be agreed prior to resource consent being granted so the exemption is made clear in the conditions of consent.

Continuing with the existing Development and Financial Contributions policy is not considered to be a viable option as this does not match the current, or desired future approach of Council.

Financial Contributions Policy

Document ID 346192

Page 1 of 19

## Overview

## Purpose of the Policy

Population and business growth create the need for new subdivisions and developments, and these place increasing demands on the assets and services provided by Council. As a result, significant investment in new or upgraded assets and services is required to mitigate the environmental effects and meet the demands of growth. In this policy, this investment is termed the cost of growth.

Under Section 106 of the *Local Government Act*, Napier City Council can require development or financial contributions from developers to help fund the cost of new or expanded infrastructure and services that are required to meet the additional demand created by growth, and/or to avoid, remedy, or mitigate any adverse effects resulting from land development and subdivision.

Council intends to achieve this in the short term by using Financial Contributions under the *Resource Management Act 1991* (RMA91). This approach covers all types of development (residential and non-residential) and is a city-wide approach for development anywhere in Napier City.

## Navigating this document

**Part 1: Policy operation** - provides information needed to understand if, when, and how financial contributions will apply to developments. It also explains peoples' rights and the steps required to properly operate the Policy. The key sections are:

- The contributions how much will be levied.
- When financial contributions are levied and paid
- Other operational matters

Part 2: Policy Details - requirements of the policy.

Part 3: Supporting Information - Policy maps, District Plan references and definitions.

#### Changes to the policy

This policy retains the use of financial contributions for residential development used in the previous policy. The main change is that non-residential developments will now also be levied a financial contribution. This is consistent with Council's current operational practice; however, it is a change from the previous policy regarding the use of development contributions for non-residential development.

Financial Contributions Policy

Document ID 346192

Page 2 of 19

## 1. Policy Operation

Council's functions under the RMA include establishing and implementing methods to achieve integrated management of the effects of the use, the development or the protection of land, and the control of subdivision. The charging of financial contributions is an important mechanism in carrying out those functions and ensuring there are positive effects on the environment that avoid, remedy, or mitigate any adverse effects resulting from land development and subdivision. Council considers the existing financial contributions the simplest and most effective means of funding growth costs as they are in place for the main development areas that are partially developed, or about to be developed.

Financial Contributions are a component of the City of Napier District Plan (Nov 2011). Copies of the City of Napier District Plan can be viewed at the Napier and Taradale Public Libraries and on Napier City Council's website www.napier.govt.nz. This is termed the operative District Plan is this policy.

#### 1.1. Assessment criteria

Chapter 65 of the District Plan specifies in detail the issues, objectives, policies, and rules relating to financial contributions. The provisions of the District Plan on financial contributions relate to the following matters:

- 1. Residential Subdivision
  - a. On every subdivision the financial contribution per lot must be paid to the Council for each additional lot or certificate of title created by the subdivision.
  - b. Financial contributions do not apply where the subdivision is solely for the purpose of creating a title for an existing dwelling unit.
- 2. Residential Multi-Unit Development
  - a. On every multi-unit development for residential purposes, the financial contribution must be paid to the Council for the second and each subsequent unit of the development.
- 3. Industrial and Commercial Land Development
  - a. On every land development for industrial and/or commercial purposes, the financial contribution must be paid to the Council for:
    - i. Each additional lot or certificate of title created by the subdivision.
    - ii. The second and each subsequent unit of development.
  - b. Financial contributions do not apply where the subdivision is solely for the purpose of creating a title for an existing and lawfully established business unit.

For non-residential developments where a resource consent would not normally be required (complying or permitted activity), Council may require a resource consent for the purpose of levying a financial contribution - see Section 1.6.

Financial Contributions Policy

Page 3 of 19

## Financial contributions are established in the following three categories:

| <ol> <li>Non local (off site)</li> <li>Local (off site)</li> </ol> | Off Site Services means local services serving a particular locality provided at the time of land development (including subdivision) e.g. extended reticulation and sewer trunk mains and/or non-local services provided at district level in response to demand from new development e.g. increased sewage treatment capacity. Costs for off site services may be shared between various developers and the Council on behalf of existing sites. |   |
|--|--|---|
| 3. On site   | On Site Services means services within a land development (including a subdivision) paid for wholly by the developer and vested in the Council, e.g. on site sewer reticulation.   | Γ |

## 1.2. Summary of Financial Contributions

All financial contributions are summarised in the tables below for both residential and non-residential development. These have been indexed as permitted by the District Plan. The original financial contributions as per the operative District Plan, and the inflation indexes can be found in Part 3 of this policy.

| Table 1 : Infill, | Residential | and Rural | Financial | Contributions |
|-------------------|-------------|-----------|-----------|---------------|
|                   |             |           |           |               |

| Development Area                  |                          | I Off Site   | Local Off Site Contributions On Si |                     | On Site Cor              | ite Contributions |  |
|-----------------------------------|--------------------------|--------------|------------------------------------|---------------------|--------------------------|-------------------|--|

#### 1.3. Capital contributions

In addition to the above financial contributions, the subdivider or developer is required to meet the cost of providing all infrastructure within land being developed or subdivided where the benefits accrue directly to the land being subdivided or developed.

Where existing infrastructure and services outside the land being subdivided or developed are inadequate for the existing development, the cost of upgrading or the provision of new facilities shall be shared fairly between the subdivider or developer and the Council if there is capital works of benefit to another area.

The subdivider or developer is required to meet the proportionate cost of upgrading infrastructure, or for the provision of new infrastructure, where the development/subdivision will necessitate such upgrading or new offsite services.

However, Council will still have the authority to require works or services, or seek cash or land contributions on new developments to avoid, remedy and mitigate the environmental effects of proposed developments through resource consent conditions or in accordance with any relevant rule in the District Plan or any transitional provision under the RMA.

Financial Contributions Policy

Document ID 346192

Page 5 of 19

#### 1.4. Financial Contributions - Reserves

There is a long history of requiring subdivision of land to provide land or money for the purpose of providing public open space as reserves. Reserves are generally required as part of the subdivisions process since they provide the open space and recreation facilities and opportunities necessary to cater for additional demand generated and to protect or enhance amenity values.

As communities grow, there is a need to provide recreation and open space to meet their needs and requirements. The guiding principle in the determination of reserves requirements relating to city growth is the preservation of the current ratio of recreational reserves per residential lot.

This ratio for Napier has been calculated at 75 m<sup>2</sup> per residential property and is considered both satisfactory by current users and appropriate for the future.

1.5. Land, works or assets provided in lieu of financial contributions

Where the developer provides assets that council would typically provide, in lieu of financial contributions, the amount of the works shall be off-set against the total financial contribution applicable. The mechanism of how the total contributions is calculated (per lot, per metre road frontage, per hecatre) will not be considered as part of the off-set calculation.

1.6. Timing of assessment, invoicing and payment

All financial contributions shall be levied as a condition of resource consent. The process for both residential and non-residential development is shown below.

#### **Residential**

The financial contribution shall be notified as a condition of resource consent (typically subdivision) when the consent is granted.

The invoice shall be generated at the time the Section 224 Certificate is requested.

Once the payment of the financial contribution is received and all other conditions are met, the Section 224 Certificate shall be issued.

#### Non-Residential

The financial contribution for non-residential development will be assessed at the building consent stage. However, the financial contributions shall be levied as a condition of resource consent. A resource consent will be required for:

- A permitted activity the development will only be a permitted activity if the applicant has paid financial contributions. If the applicant has not paid financial contributions at the building consent stage, we can issue a certificate in terms of Section 37 of the Building Act 2004, requiring the applicant to apply for resource consent.
- Not a permitted activity a resource consent will be required as per standard practice for the development.

The invoice shall be generated before the building consent is uplifted.

Once the payment of the financial contribution is received and all other conditions are met, the building consent may be uplifted.

Any land use not identified as a controlled activity, a restricted discretionary activity, a discretionary activity or a prohibited activity elsewhere in this plan and that complies with all the relevant conditions is a permitted activity.

#### Non-Payment

On time payment is important because, until the financial contributions have been paid in full, Council may:

Financial Contributions Policy

Document ID 346192

Page 6 of 19

- withhold Section 224 Certificate being issued.
- prevent a building consent being uplifted or issued, or prevent the commencement of the building.

Council may also retain the right to pursue all normal debt collection processes should payment be withheld.

1.7. Exemptions

#### City Centre

Council wishes to encourage residential growth in certain areas in order to revitalise the city centres. Accordingly, the exemptions to financial contributions below shall apply for the following developments:

- 1. A new residential unit within the Art Deco Quarter and Inner City Commercial Zone within an existing gross floor area shall be exempt 80% of the financial contribution. Any new residential unit in addition to the existing floor area will be exempt by 50%. This reflects the fact that where a conversion development occurs within the existing built city environment, there is not always an established link between residential activity and an increased demand on services like 3-waters and transportation. However, there is an increase in demand for community infrastructure and parks/reserves, and from the new floor area that did not previously exist.
- 2. Any multi-unit residential development within Fringe Commercial Zone and Taradale Suburban Commercial Zone shall be exempt 50% of the financial contribution.
- 3. Any multi-unit residential development within the main commercial centers in Marewa, Napier South, Onekawa, Greenmeadows, Maraenui, Taradale and Tamatea (as per map in Figure 4) shall be assessed based on the number of bedrooms in each apartment/unit. This is considered a fair way to reflect the lower demand typically created by smaller apartments compared to a residential dwelling. The exemptions shall be:

| 0 | One bedroom unit | 50% exemption |
|---|------------------|---------------|
|---|------------------|---------------|

- Two bedroom unit
   33% exemption
- Three or more bedroom unit 0% exemption

The greater of the above exemptions shall be applied, however, a single development may only be granted one exemption. The approval of an exemption should be agreed prior to resource consent being granted so the exemption is made clear in the conditions of consent.

#### Non-connection

Where a development does not connect to Council's water supply, wastewater, and/or stormwater network, the development shall be exempt from these components of the financial contributions.

1.8. Extraordinary Circumstances

Council reserves the discretion to enter into specific arrangements with a developer for the provision of particular infrastructure to meet the special needs of a development, for example where a development requires a special level of service or is of a type or scale that is not readily assessed in terms of units of demand, or is developed through a legislative consent process outside of the RMA.

1.9. Refunds and Postponements

For the purposes of this Policy, refunds and/or postponements on payment of Financial Contributions will not be applied.

1.10. Tax - GST

Financial contributions required will incur a Goods and Services Tax at the appropriate rate. All figures in the above tables in this section are as on 1st July 2021 and are shown inclusive of GST of 15%.

#### 1.11. Future indexing

Financial contributions for subsequent years (taking into account indexation) will be shown in Council's Schedule of Fees and Charges, available from 1st July each year. These will be adjusted based on the latest Producer Price Index (EE Construction SQNEE0000).

## 1.12. Example calculations

The following tables provides a range of examples for calculations of subdivision and developments in Napier city.

| Variable                         | Inputs/Calculations    | Unit     |
|----------------------------------|------------------------|----------|
| Location                         | Mission Special Charac | ter Zone |
| Development type                 | Subdivision            |          |
| Lots                             | 50                     | lots     |
| Non-local Off-Site Contributions | \$20,813               | inc GST  |
| Local Off-Site Contributions     | \$1,078                | inc GST  |
| On-Site Contributions            | \$0                    | inc GST  |
| Sub-Total (\$/lot)               | \$21,891               | per lot  |
| TOTAL Financial Contribution     | \$1,094,543            | inc GST  |

| Variable                         | Inputs/Calculations                  | Unit    |
|----------------------------------|--------------------------------------|---------|
| Location                         | Urban Infill - within exemption zone |         |
| Development type                 | Subdivision                          |         |
| Lots                             | 4                                    | lots    |
| Non-local Off-Site Contributions | \$25,627                             | inc GST |
| Local Off-Site Contributions     | \$2,583                              | inc GST |
| On-Site Contributions            | \$0                                  | inc GST |
| Sub-Total (\$/lot)               | \$28,210                             | per lot |
| Exemption @ 50%                  | \$14,105                             | per lot |
| Revised Sub-Total (\$/lot)       | \$14,105                             | per lot |
| TOTAL Financial Contribution     | \$56,420                             | inc GST |

| Variable                                | Inputs/Calculations                | Unit    |

Page 9 of 19

## 2. Policy Details

## 2.1. Requirement to have a policy

Council is required to have a policy on development contributions and financial contributions as a component of its funding and financial policies in its Long Term Plan under section 102(2)(d) of the LGA02. This Financial Contributions Policy meets that requirement.

## 2.2. Funding summary

Over the next 10 years, Council plans to spend over \$104M on infrastructure partially or wholly needed to meet the increased demand for community facilities resulting from growth/development. Of this cost, 13% percent will be funded from financial contributions. A summary by asset grouping is shown below.

| Table 2 : NOC 2024 Lang | Term Capital Europediture grouth  | valated agets and funding   |

| Wastewater                       | 154,759  | 33,375                                      | 22%                           | 78%                                     |
| Water Supply                     | 133,816  | 28,029                                      | 21%                           | 79%                                     |
| TOTAL                            | 805,327  | 104,566                                     | 13%                           | 87%                                     |

2.3. General purposes for which financial contributions may be used

Council has decided to fund these growth related costs from financial contributions under the *Resource Management Act 1991* for the following activities:

- Water Supply
- Wastewater Disposal
- Waste Disposal
- Sports and Reserves
- Roads and Transportation
- Recreation Facilities
- Stormwater Disposal
- Library Facilities

#### 2.4. Considerations for funding growth costs

In forming this view, Council has considered the matters set out in section 101(3) of the LGA02 within its Revenue and Financing Policy, and within this Policy.

Council is required under Section 106(2)(c) of the LGA02 to explain within this Policy why it has decided to use financial contributions to fund capital expenditure relating to the cost of growth. This assessment is below.

Council outlines its community outcomes in the Long Term Plan. The community outcomes that Council will contribute to, among other things, is the funding of capital expenditure for growth for water supply, wastewater, stormwater, road, reserves, and community infrastructure. The community outcomes and goals are listed below.

| Outcome                              | Napier City Goal   |
|--------------------------------------|--|
|                                      | Napier is a vibrant city through excellent strategy and planning.  |
|                                      | Social cohesion is achieved for all ages and ethnicities.  |
| A vibrant city for                   | Innovative services are provided using technology whilst protecting the environment.                                     |
| everyone                             | Technology connects Napier to the rest of New Zealand and the world.   |
|                                      | Napier is an appealing tourist destination.  |
|                                      | Business-friendly economic development is encouraged.  |
| Excellence in infrastructure         | Facilities and infrastructure will support community and visitor needs, focusing on excellent service and accessibility. |
| and public<br>services for now       | Napier's transportation system is safe and affordable.   |
| and the future                       | All transport choices are catered for: cars, cycles, pedestrians, and disabled users.                                    |
| A sustainable city                   | Our natural resources are renewed and enhanced. We act as steward for our environment for future generations.            |
| City                                 | Napier values its character and history Napier is an affordable city to live in.   |
| Council works                        | Council guides the city with effective leadership.   |
| with and for the community           | Council encourages community consultation and collaboration to assist in shaping the future direction of the city.       |
| A safe and healthy city that         | Services and facilities support social and recreational opportunities Community safety is supported and improved.        |
| supports<br>community well-<br>being | Social services are supported.   |

Financial Contributions Policy

Document ID 346192

Page 11 of 19

Council has also considered the funding of growth-related costs specific to the other matters required by s101 (3) of the LGA. A summary of this assessment is below.

| Who Benefits<br>/ whose act<br>creates the<br>need       | A significant portion of Council's work programme over the next 30 years is driven by development or has been scoped to ensure it provides for new developments. The extent to which growth is serviced by, and benefits from, an asset or programme as well as how much it serves and benefits existing ratepayers is determined for each asset or programme.  |
|--|---|
|  | Council believes the growth costs identified through this process should be recovered from development as this is what creates the need for the expenditure and /or benefit principally from new assets and additional network capacity. Where and to the extent that works benefit existing residents and businesses, those costs are recovered through rates.   |
|  | The geographical areas are defined by the maps in the District Plan and summarised in Part 1 of this policy.  |
| Period of<br>benefit                                     | The assets constructed for development provide benefits and capacity for developments now and developments in the future. In many cases, the 'capacity life' of such assets spans decades.  |
|  | Financial contributions are used to recover the capital costs to service an entire development area, over the capacity life of assets. Developments that benefit from the assets will contribute to its cost, regardless of whether they happen now or in the future.   |
| Funding<br>sources &<br>REASONING                        | The cost of supporting development in Napier City is significant. Financial contributions send clear signals to the development community about the cost of growth and the capital costs of providing infrastructure to support that growth.  |
| for separate<br>funding                                  | The benefits to the community are significantly greater than the cost of policy making, calculations, collection, accounting, and distribution of funding for financial contributions.  |
| Overall<br>impact of<br>liability on<br>the<br>community | Council has also considered the impact of the overall allocation of liability on the community. In this case, the liability for revenue falls directly with the development community. Council considers that the level of financial contributions is affordable and does not consider it likely that there will be an undue or unreasonable impact on the social, economic, and cultural wellbeing of this section of the community. |
|  | Moreover, shifting development costs onto ratepayers is likely to be perceived as<br>unfair to existing residents as it would significantly impact the rates revenue required.<br>Existing residents do not cause the need, or benefit directly from the growth<br>infrastructure, needed to service new developments.  |
|  | Overall, Council considers it fair and reasonable to use financial contributions to fund<br>the costs of growth-related capital expenditure for community facilities, and that the<br>social, economic, and cultural interests of Napier's communities are best advanced<br>this way.   |

Financial Contributions Policy

Document ID 346192

Page 12 of 19

## 2.5. Implementation and review

It is anticipated that this Policy will be updated on a three-yearly basis or at shorter intervals if Council deems it necessary. Any review of the Policy will take account of the following:

- Any changes to significant assumptions underlying the Financial Contributions Policy.
- Any changes in the capital development works programme for growth.
- Any changes in the pattern and distribution of development in the District.
- Any changes that reflect new or significant modelling of the networks.
- The regular reviews of the Revenue and Financial Policies, and the Long Term Plan.
- Any other matters Council considers relevant.
- Any review of the Urban Growth Study and Essential Services Development Plans.
- Any changes in legislation.

2.6. Significant Assumptions of the Financial Contributions Policy

Council has taken an approach to ensure that the cumulative effect of development is considered with a systemwide view. This Policy considers the specific infrastructure demands created by individual developments in the context of Council's wider community responsibilities as an infrastructure service provider.

The capital expenditure budgets and projected estimates of future asset works are based on the best available knowledge at the time of preparation. The Policy will be updated, as practical, to reflect better information as it becomes available.

Council continues to work with its neighboring and regional councils to provide for and manage the demand for both residential and non-residential growth.

The key risks that Council will continue to monitor and mitigate are as follows:

- That the costs required to service the development areas is higher than forecast resulting in a funding gap of the growth costs.
- That the growth predicted does not eventuate, resulting in a change to the assumed rate of development and impacting council's revenue.
- Development may occur in areas not considered in the operative District Plan, and therefore may not have appropriate funding mechanisms in place to recover the costs.
- The potential changes to existing legislation, e.g. RMA reform, 3-Waters reform, fast tracked development areas.

To guard against the above, Council will continue to monitor the rate of growth, the timing of the delivery of assets/capacity and the funding policies in place, as required.

## 3. Supporting information

## 3.1. Inflation indexes

As permitted in the operative District Plan, the financial contributions in Part 1 of this policy have been adjusted based on the Producer Price Index (EE Construction SQNEE0000). The indexes are based on the following clauses in the operative District Plan:

• Residential (notes below Table 1 (Chapter 65) Residential and Rural Financial Contributions);

All figures in the table are as at 1 July 2010 - 30 June 2011 (based on December 2009 indices)

• Non-Residential (Chapter 65; 65.13 Indexing of Financial Contributions)

The financial contributions stated elsewhere in this Chapter are as at 1 July 2005 - 30 June 2006 (based on December 2004 PPI values) for Commercial and Industrial financial contributions.

The index and the adjustment for the residential and non-residential financial contributions are shown in the table below.

| PPI Quarter | Policy start<br>date | Index | Residential %<br>adjustment | Non-Residential %<br>adjustment |
|-------------|----------------------|-------|-----------------------------|---------------------------------|

#### 3.4. Definitions

Allotment/lot has the same meaning as set out in Section 218 of the ACT.

Bedroom: a room of minimum 6m<sup>2</sup> in area, which could be used for sleeping in, usually containing a bed.

**Commercial Activity** means the USE of LAND and BUILDINGS for the display, offering, provision, sale or hire of goods, equipment or service and includes retailing, TRAVELLERS' ACCOMMODATION, DAY CARE CENTRE and off-licence premises and wholesale liquor outlets, but does not include EDUCATION FACILITIES or any BUSINESS OF PROSTITUTION.

**Council** means the Napier City Council or any committee or elected member of Council or any officer authorised to exercise the functions, duties or powers of the Council.

**Dwelling Unit** means a BUILDING or part of a BUILDING designed for residential purposes and occupied or intended to be occupied exclusively as the home or residence of not more than one HOUSEHOLD and includes an apartment, a flat including kaumatua flats and a RESIDENTIAL CARE FACILITY, but does not include a SUPPLEMENTARY UNIT. Second kitchen facilities in conjunction with service facilities constitutes a second dwelling unit.

Financial Contribution means a contribution as set out in section 108(9) of the ACT.

**Greenfield Development** means an area zoned for the purpose of allowing intensive 'Land Development'. Existing Greenfield sites are identified in Appendix 31 of this Plan as 'Development Areas'. For all new Greenfield areas, Council will consider:

i) the need for a Structure Plan that indicates the services to be provided by the developer, and

ii) the financial contributions that will be required to avoid, remedy or mitigate any environmental effects associated with land development

New Greenfield areas will be introduced to the Plan by way of a variation or Plan Change or at the time of a Plan review.

**Gross Building Area** means the sum of the area of all BUILDINGS on a SITE as viewed vertically from above and includes all eaves and overhangs.

**Gross Floor Area** means the sum of the area of all floors of all BUILDINGS on a SITE measured from the outside walls on every floor and includes enclosed conservatories and enclosed decks but does not include open and covered decks.

Industrial Activity means the USE of LAND and/or BUILDINGS for the primary purpose of manufacturing, assembling, testing, fabricating, processing, packing or associated storage of goods and the servicing and repair of goods and vehicles and includes SERVICE STATIONS and TRANSPORT DEPOTS, and STORAGE OF TYRES.

**Infill Development** means the further subdivision and/or development of an existing site, but excluding the development areas identified in Appendix 31. (For the purposes of this Plan all sites are deemed to be existing, except those specifically identified as Greenfield or development areas).

Infrastructure means those built STRUCTURES necessary for operating and supplying NETWORK UTILITY OPERATIONS and services to the community including, but not limited to, RADIOCOMMUNICATIONS, TELECOMMUNICATIONS, natural or manufactured fuel, electricity, water, drainage, sewerage, ROADS, railway lines and airports.

Land Development and Development means any land use:

- Involving SUBDIVISION; (including all associated network utility operations required to service the subdivision); or
- Involving MULTI-UNIT DEVELOPMENT; (including all associated network utility operations required to service the multi unit development); or
- Requiring EARTHWORKS design pursuant to Chapter 52A; or

Financial Contributions Policy

Document ID 346192

Page 24 of

 Requiring an extension to one or more of the COUNCIL'S existing NETWORK UTILITY OPERATIONS.

LGA means the Local Government Act 2002.

**Multi-Unit Residential Development** in respect means any BUILDING or group or groups of BUILDINGS on the same SITE which contains, whether attached or detached, two or more HOUSEHOLDS and subject to the exceptions hereinafter listed includes all apartment buildings and flats, but shall not include any of the following:

(a) TRAVELLERS' ACCOMMODATION.

(b) staff accommodation at HEALTH CARE CENTRES or EDUCATION FACILITIES.

RMA or the Act, means the Resource Management Act 1991 and its amendments

Resource Consent has the same meaning as set out in Section 2 of the ACT.

Residential Activity means the USE of LAND and BUILDINGS (including ACCESSORY BUILDINGS such as garages, carports and storage sheds) by a HOUSEHOLD (whether any person is subject to care, supervision or not), and includes RESIDENTIAL CARE FACILITIES but does not include HOME OCCUPATIONS, or TRAVELLERS' ACCOMMODATION.

**Rural Environment** means any area of LAND identified in this PLAN as being included in the Main Rural, Rural Residential, Rural Commercial, Rural Conservation, Rural Settlement Jervoistown or Lifestyle Character zones.

**Supplementary Unit** means a single bedroomed BUILDING located on the same SITE as a DWELLING UNIT, used or intended to be used solely for residential purposes and occupied or intended to be occupied as a home or residence.

## Key Financial Policies Consultation Plan

## The Project

As part of the Long Term Plan (LTP) process, we have reviewed our key financial policies. We are proposing to make adjustments to four policies that affect how rates are gathered and how financial contributions for new developments are calculated. It is appropriate that these are considered together given the interconnected nature of these policies and their relevance to the LTP.

The four policies are:

- Revenue and Financing Policy
  - The Revenue and Financing Policy explains how we cover our operational and capital costs.
  - We recently updated the Revenue and Financing Policy and heard extensive submissions in the process. The changes altered the way that rates income is split between different types of properties including residential, commercial and rural. This resulted in most properties seeing a small decrease in rates, while some had an increase.
  - Financial Contributions Policy
    - The Financial Contributions Policy sets out the contributions required from property developers to help fund the cost of new infrastructure in the city.
- Rating Policy
  - The Rating Policy outlines the types of rates the Council collects (e.g. general versus targeted) and how and when these are collected.
- Rates Remission Policy
  - The Rates Remission Policy explains the circumstances where properties will be exempt from some or all of the rates they would normally incur.

#### Consultation on proposed changes

The proposed changes are as follows:

- Revenue and Financing Policy
  - Changing the way Council's housing activities are funded The change will allow this activity to be funded from other sources additional to rental income e.g. rates and loans.
- Rating Policy (information only)
  - New valuations have come in since we made changes earlier in the year to the Revenue and Financing Policy, which will impact on the rates charged for some properties. Land values have increased for commercial and industrial properties in particular.
  - Including the proposed 8% average rates increase (per rateable property), these new valuations will mean 3000 properties will have rates increases of greater than 10%, and 100 properties have increases of more than \$10,000 pa. We will directly inform these commercial and industry property owners of the impact on their rates.
  - Residential property owners, in the main, will receive a decrease due the changes of the Revenue and Financing policy, but an increase overall due to the proposed 8% average increase in 2021/22.

Consultation Plan – Key Financial Policies 29 March 2021

- Financial Contributions Policy
  - Development contributions will no longer be required and only financial contributions will be charged. This is being done to create a more robust yet simple system of financing new infrastructure.
  - Introducing new exemption categories for residential growth in the city centre and multi-unit developments to support our proposed District Plan goals.
- Rates Remission Policy
  - Several administrative amendments have been made which are designed to increase the efficiency of rates collection such as remissions on council property and changing remissions for refuse collection and recycling.

#### Significance and Engagement Policy

When considered together, the amendments to these policies are of moderate significance and are important given their relationship to the LTP. The proposed amendment to the way that housing is funded is particularly relevant given the proposal in the LTP to fund the identified shortfall in housing income through a loan. In order to apply loan funding or rates income to housing costs, a change to the Revenue and Financing Policy is first needed.

Engagement activities will inform the community and key stakeholders of the changes being made and what their likely impact will be. Feedback will be sought on the proposals with some of the proposals providing options for consideration.

#### Purpose of Communication and Engagement

The objectives of the consultation are to:

- Inform the community of the proposed changes
- Explain the likely impacts of the proposed changes
- · Seek feedback, including options that have been identified.

#### Approach

•

The amendments to these policies will be consulted on separately from the LTP. The policies impact the LTP and need to be confirmed prior to the LTP deliberations. Hearings and deliberations will be completed before the LTP hearings and deliberations.

Information will be sent to all commercial properties, property developers and other key stakeholders with links to the feedback form. Commercial ratepayers will be able to use the rates calculator to find out how the changes will affect them and property developers will be able to view the new financial contributions methodology to understand what this will mean for them.

Council housing stakeholders and tenants will be advised of the proposed change to Revenue and Financing Policy given its potential future impact on how this activity is funded. They will have the opportunity to comment on the proposed change.

#### **Consultation Timeline**

| Item                 | Submissions Open | Submissions Close | Hearing Dates |
|----------------------|------------------|-------------------|---------------|
|                      |                  |                   |               |
| Revenue and          | 12 April         | 12 May            | 1 June        |
| Financing Policy     |                  |                   |               |
| Financial            | 12 April         | 12 May            | 1 June        |
| Contributions Policy |                  |                   |               |
| Rating Policy        | 12 April         | 12 May            | 1 June        |
| Rates Remission      | 12 April         | 12 May            | 1 June        |
| Policy               |                  |                   |               |

## **Communication & Engagement Tools**

The consultation process will be promoted through digital and print channels with notification of the consultation provided directly to commercial ratepayers.

## 7.1 Purpose of Report

The purpose of this report is to approve a change to the schedule of Council and Committee meetings for 2021 as set out below. The amendments are indicated in red on the meeting schedule appended to this report (**Attachment 1 – Doc Id 1300212**).

## **Additional Meetings :**

| • | Hearings Committee (Dogs)   | 11 May 2021 (1pm)               |
|---|---|---------------------------------|
| • | Council Hearing (Revenue & Financing Policy and the Development Contributions Policy) | Commencing 1 June 2021<br>(1pm) |

## Officer's Recommendation

That Council:

- a. Receive the report "Amendment to the 2021 Council/Committee Meeting Schedule".
- Adopt the amendment to the 2021 Meeting Schedule as below:
   Additional Meetings:
- Hearings Committee (Dogs)
   Council Hearing (Revenue & Financing Policy and the Development Contributions Policy)
   Commencing 1 June 2021 (1pm)

## 7.2 Background Summary

The Local Government Act 2002, Schedule 7, Clause 19 states:

- (4) A local authority must hold meetings at the times and places that it appoints.
- (5) ...
- (6) If a local authority adopts a schedule of meetings
  - a) The schedule
    - *i)* may cover any future period that the local authority considers appropriate, and
    - ii) may be amended; and

b) notification of the schedule or of any amendment to that schedule constitutes a notification of every meeting to the schedule or amendment.

Although a local authority must hold the ordinary meetings as scheduled, Council may at a meeting, amend the schedule of dates, times and number of meetings to enable business to be managed in an effective way.

Although staff attempt to meet the needs of Council it is inevitable that the schedule will need to be amended from time to time and these amendments will be notified to elected members via the Councillor diary as they arise.

While the schedule serves to give elected members notice of the upcoming meetings there is still a requirement under the Local Government Official Information and Meetings Act 1987 for the public to be advised on a regular basis of the meetings scheduled for the next month.

The schedule includes the meetings of all committees not only so that members can plan ahead, but also to ensure that meetings days are in fact available and not later taken up by other meetings. Where scheduled meetings are not required cancellations will be advised to members as early as possible.

## 7.3 Issues

This report is being presented directly to Council for a decision as the meeting cycle does not allow a passage through the Standing Committees prior to meeting deadlines.

## 7.4 Significance and Engagement

This matter, of an amendment to the schedule of meetings, does not trigger Council's Significance and Engagement Policy or any other consultation requirements.

Refer to the individual report(s) for the relevant meeting for comments related to the Significance and Engagement Policy.

## 7.5 Implications

## Financial

There will be minor additional costs for venue hire and live streaming of the additional meetings.

## Social & Policy

N/A

## Risk

Further changes to the schedule could result in difficulty finding a suitable venue and increased costs.

## 7.6 Options

The options available to Council are as follows:

- a) To adopt the amended 2021 meeting schedule as proposed
- b) To propose further amendments to the meeting schedule

## 7.7 Development of Preferred Option

It is recommended that the amended 2021 meeting schedule be adopted as proposed.
